Leadership is a learned skill. No one is a "natural-born leader." Babies aren't given a manual on how to be an adult. Adulthood is learned from others. So how will we teach eager distributors to become leaders? By showing, participating, experiencing ... and of course, sharing stories. Yes, our distributors could imitate us to become leaders, but not everyone is created the same, with the same set of skills or advantages. So there must be common lessons everyone can learn for leadership. Inside this book you will find many ways to change people's viewpoints, to change their beliefs, and to reprogram their actions. And when these three things change, the results will naturally change too. Building leaders in your organization is the best investment in financial security you can make. The return on your investment is paid over and over again. And the earnings from developing one good leader could dwarf the monthly payout of almost any retirement plan. Build your network marketing business faster, now. Order your copy now!

This volume contains six new and fifteen previously published essays -- plus a new introduction -- by Storrs McCall. Some of the essays were written in collaboration with E. J. Lowe of Durham University. The essays discuss controversial topics in logic, action theory, determinism and indeterminism, and the nature of human choice and decision. Some construct a modern up-to-date version of Aristotle's bouleusis, practical deliberation. This process of practical deliberation is shown to be indeterministic but highly controlled and the antithesis of chance. Others deal with the concept of branching four-dimensional space-time, explain non-local influences in quantum mechanics, or reconcile God's omniscience with human free will. The eponymous first essay contains the proof of a fact that in 1931 Kurt Gödel had claimed to be unprovable, namely that the set of arithmetic truths forms a consistent system.

This book discusses how product platform and product family design can be used successfully to increase variety within a product line, shorten manufacturing lead times, and reduce overall costs within a product line. The material serves as a reference and a hands-on guide for practitioners involved in the design, planning and production of products. Real-life case studies that explain the benefits of platform based product development are included.

Kurt Gödel's famous First Incompleteness Theorem shows that for any sufficiently rich theory that contains enough arithmetic, there are some arithmetical truths the theory cannot prove. How is this remarkable result proved? This short book explains. It also discusses Gödel's Second Incompleteness Theorem. Based on lecture notes for a course given in Cambridge for many years, the aim is to make the Theorems available, clearly and accessibly, even to those with a quite limited formal background.

Zorovana is an elf from Valasadon a city ruled by evil Blood Guardians. For many years, Zorovana's family has sought to destroy the Blood Crest Dagger imprisoned inside a great temple, for it holds the power to kill every living being in the universe. Zorovana is her family's last hope. She must find and destroy the dagger, but she cannot do it alone. As she embarks on a journey to Armagon to find the only one who can help her her long-time friend Kaithar Zorovana realizes that she is the only elf who has ever escaped from Valasadon. Kaithar is convinced that the journey to destroy the dagger will put both elves in extreme danger. But Zorovana is relentless and determined; after she finally persuades Kaithar to accompany her, they leave on a mission that has the potential to eliminate the Blood Guardians and bring back control of the cities to its citizens. As the elves begin their long journey to the sanctum high in the mountains, they travel through forests full of trolls and hidden goblin cities and unknowingly place themselves into the deathly grip of the Blood Guardians, who will stop at nothing to protect their powerful weapon.
