This book is an extract from a much larger book entitled Designing with LibreOffice. It is intended for those who only want information on choosing and using fonts with LibreOffice, the popular free-licensed office suite. It consists of Chapter 4 and Appendixes C & D in the larger book. Although the first published extract, this book will eventually become the second of five excerpts from the complete book. The excerpts will be: Part 1: Styles and Templates Part 2: Choosing Fonts Part 3: Character and Paragraph Styles Part 4: Page, Frame, and List Styles Part 5: Slide Shows, Diagrams, and Spreadsheets Together, the five smaller books will contain most, but not all the information from the larger book. Any changes are minimal, and made for continuity or changes in structure made necessary by the changes in format.

Fonts based on handwritten scripts are some of the bestselling typefaces of the font foundries. They bring personality and authenticity to graphic design – whether on business cards and flyers, or in packaging and advertising. Script Fonts is a visual encyclopedia of over 300 fonts that includes complete alphabets and numerals for each font and a piece of sample text that shows how each typeface works in the context of a paragraph. It is richly illustrated with over 100 examples of the typefaces as used in manuscripts, on posters, in advertising and other graphic design. The book includes elegant Italian and French cursive scripts, English script fonts, expressive marker fonts, brush and swash fonts, deko and freestyle fonts – all illustrated with historical and contemporary examples. The accompanying CD includes 122 free fonts.

A hugely entertaining and revealing guide to the history of type that asks, What does your favorite font say about you? Fonts surround us every day, on street signs and buildings, on movie posters and books, and on just about every product we buy. But where do fonts come from, and why do we need so many? Who is responsible for the staid practicality of Times New Roman, the cool anonymity of Arial, or the irritating levity of Comic Sans (and the movement to ban it)? Typefaces are now 560 years old, but we barely knew their names until about twenty years ago when the pull-down font menus on our first computers made us all the gods of type. Beginning in the early days of Gutenberg and ending with the most adventurous digital fonts, Simon Garfield explores the rich history and subtle powers of type. He goes on to investigate a range of modern mysteries, including how Helvetica took over the world, what inspires the seeming ubiquitous use of Trajan on bad movie posters, and exactly why the all-type cover of Men are from Mars, Women are from Venus was so effective. It also examines why the "T" in the Beatles logo is longer than the other letters and how Gotham helped Barack Obama into the White House. A must-have book for the design conscious, Just My Type's cheeky irreverence will also charm everyone who loved Eats, Shoots & Leaves and Schott's Original Miscellany.

Street + Art = Inspiration Designers Daniel and Klaus Bellon have been photographing street signage around the world for more than 17 years. This book celebrates their love of typography, and highlights the beauty of type in its truest form; not as a profession but as a necessity of everyday life. The images captured here are at times humorous, unexpected and even charming. But for those who understand the rules that are being broken, these explorations of type design are refreshing and inspiring. Even though graphic designers often think of themselves as the keepers of letterforms and typography, they do not own them. Typography belongs to everyone. Typography belongs to the people. Includes a royalty-free CD with 15 original fonts inspired by signs in the

book. Type images were collected from countries around the world, including the United States, Dominican Republic, Puerto Rico, Belize, Canada, Colombia, Venezuela, Hong Kong, China, Singapore, and Malaysia.

This book is a hands-on guide to the entire process of making logos and fonts and even icons, all of which, essentially, start with the ability to draw letterforms. The intent of the book, in fact, is to enable the user to end reliance on "OPF" (other people's fonts) and learn to draw your own custom

font

logos, fonts and lettering! Logo, Font & Lettering Bible is unique in that it teaches you how to create logos and fonts from scratch using traditional tools as well as the computer programs Adobe Illustrator and Fontographer (plus a bit about FontLab). The book provides all the traditional rules and tips about letter formation relating to proportion, shaping, balance, spacing, composition and actually teaches five different methods of drawing letters on computer using bezier curves. There has never been a book like this one that goes into so much detail about drawing letters and takes such a fun and irreverent approach while doing so. The book is also full of inspiration and analysis of tons of great examples of vintage and current lettering from old manuscripts to graffiti. Logo, Font & Lettering Bible also shows you how to create fancy drop shadows and other type effects. And finally, the last section provides straight talk on the business of being a logo and font designer, from advertising your work and pricing to dealing with difficult clients (aren't they all?).

The Geometry of Type explores 100 traditional and modern typefaces in detail, with a full spread devoted to each entry. Characters from each typeface are enlarged and annotated to reveal key features, anatomical details, and the finer, often-overlooked elements of type design, which shows how these attributes affect mood and readability. Sidebar information lists the designer and foundry, the year of release and the different weights and styles available, while feature boxes explain the origins and best uses for each typeface, such as whether it is suitable for running text or as a display font for headlines. To help the reader spot each typeface in the wider world, the full character set is shown, and the best letters for identification are highlighted.
