Baptismal fonts were necessary to the liturgical life of the medieval Christian. Baptism marked the entrance of the faithful into the right relation, with the Catholic Church representing the main cultural institution of medieval society. In the period between ca. 1050 and ca. 1220, the decoration of the font often had an important function: to underscore the theology of baptism in the context of the sacraments of the Catholic Church. This period witnessed a surge of concern about sacraments. Just as religious thinkers attempted to delineate the sacraments and define their function in sermons and Sentence collections, sculptural programs visualized the teaching of orthodox ideas for the lay audience. This book looks at three areas of primary concern around baptism as a sacrament – incarnation, initiation, and the practice of baptism within the institution of the Church – and the images that embody that religious discussion. Baptismal fonts have been recognized as part of the stylistic production of the Romanesque period, and their iconography has been generally explored as moral and didactic. Here, the message of these fonts is set within a very specific history of medieval Catholic sacramental theology, connecting erudite thinkers and lay users through their decoration and use.

A hugely entertaining and revealing guide to the history of type that asks, What does your favorite font say about you? Fonts surround us every day, on street signs and buildings, on movie posters and books, and on just about every product we buy. But where do fonts come from, and why do we need so many? Who is responsible for the staid practicality of Times New Roman, the cool anonymity of Arial, or the irritating levity of Comic Sans (and the movement to ban it)? Typefaces are now 560 years old, but we barely knew their names until about twenty years ago when the pull-down font menus on our first computers made us all the gods of type. Beginning in the early days of Gutenberg and ending with the most adventurous digital fonts, Simon Garfield explores the rich history and subtle powers of type. He goes on to investigate a range of modern mysteries, including how Helvetica took over the world, what inspires the seeming ubiquitous use of Trajan on bad movie posters, and exactly why the all-type cover of Men are from Mars, Women are from Venus was so effective. It also examines why the "T" in the Beatles logo is longer than the other letters and how Gotham helped Barack Obama into the White House. A must-have book for the design conscious, Just My Type's cheeky irreverence will also charm everyone who loved Eats, Shoots & Leaves and Schott's Original Miscellany.

Computers have changed typography and prepress as well as printing. Typefaces are manufactured by "digital punch cutters" with a PC, not any more by punch cutters. Typefaces are constructed an output by a new technolgy, the so-called fonttechnology. The book by Peter Karow covers the whole area of it. It offers

various chapters about (among others) issues like intelligent font scaling, kerning, quality of type, legibility, and problems of different output devices. It is interesting to read about Gutenberg setting, the font market, optical scaling, and last but not least a "hand on" Kanjhi, the Chinese/Japanese Glyphs. Furthermore, Fonttechnology contains a number of valuable and instructive appendices. Almost everything one has to know about type and computers!

In 1985, Berkeley-based graphic design company Emigre, the publisher of the legendary design magazine of the same name, launched one of the first independent digital type foundries to explore the new design possibilities offered by the MacIntosh computer. To announce each of their new typeface releases, Emigre published small booklets displaying the virtues of the fonts and revealing the processes used to design them. By creating specific contexts, many of these so called "type specimens" went beyond being simple sales tools. In fact the Emigre booklets were meant to be enjoyed as much for the typefaces as for their esoteric content.
