**Osprey It Ain't So!** - Daniel R. Robichaud 2018-12-09 The martial arts expert Velma "Jinkies" Ramp has ties to both US and Japanese interests, so she was a sure selection to lead the team investigating a string of sabotage incidents targeting US Military equipment in Okinawa, Japan. The saboteur's target: The MV-22 OSPREY transport vehicle, a VTOL delivery system for Marine Corp units. High command believes the ruthless organization Skorpion is tied to the incidents. Jinkies and her KiFoe operatives are tasked to identify the culprit or culprits and take action. However, the list of suspects includes a protesting dissident from the States, local business owners who hate the noise polluting OSPREY, and even personnel on base itself who might have hidden secrets of their own. The Kinetic Force operatives have their work cut out for them...and lives are hanging in the balance. "OSPREY It Ain't So!" is a novella length adventure told in the spirit of 1980s military action comics and novels, tackling the efforts of a team of specialists struggling to stop a ruthless terrorist organization from destroying democracy. At 18k words long, it offers plenty of characterization, local color, and thrilling action to satisfy fans of Larry Hama and David Morrell. Although a part of the Kinetic Force line of military action thrillers, "OSPREY It Ain't So!" is a stand-alone adventure. It ties into the overarching story, but can be fully appreciated by new readers as well.

**Just Needs a Recharge** - Rob Siegel 2018-04-24 Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively expensive. In his new book, Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin.

**Exploring Japanese University English Teachers' Professional Identity** - Diane Hawley Nagatomo 2012-01-30 This book contributes to the growing field of EFL teacher identity, which is now recognized to influence numerous aspects of classroom teaching and of student learning. It focuses on an under-researched, and yet highly influential group of teachers that shape English language education in Japan: Japanese university English teachers. In three interrelated narrative studies, it examines how four relatively new teachers develop professional identity as they become members of the community of practice of university English teachers; how gender impacts the professional identity of seven female professors ranging in age from their early 30s to their 60s; and how one teacher's teaching practices and beliefs reflect her personal and professional identity.
Second Strike - Mark Abernethy 2010 In the early hours of 13 October 2002, Australian spy Alan McQueen is jolted awake and told to head immediately to Bali, where more than 200 people have been killed in a series of bomb blasts. Assigned to keep an eye on the forensic teams working the bomb sites, McQueen - aka Mac - discovers that, contrary to the official line, a mini-nuclear device probably caused the most destructive of the blasts. As tensions rise between governments, Mac joins an elite unit of spies and soldiers hunting down the terrorists implicated in the bombings. The pursuit takes them through the wilds of Northern Sumatra, but ends with them watching helplessly as the terrorist ring leaders escape by plane. Five years later, Mac is back in Indonesia doing some soft espionage. But when bullets start flying and old terrorist foes reappear, Mac is drawn into a deadly game that clearly didn't finish in October 2002. Fighting complacency within his own ranks, Mac keeps track of the terrorists until he can no longer ignore the evidence that they have another, more powerful mini-nuke?and their next target is Australia! Resurrecting Bertha - Rob Siegel 2019-09-15 To most people, cars are just appliances to be disposed of when they rust, become unreliable, or are outgrown. But to car people, it's different. Cars are like photographs that occupy physical space. They hold aromas that trigger memories, and remind us of who we once were. In addition, to some people, the relationship with the car itself is a real thing. Many enthusiasts pine for
the cars of their youth, regret that they ever let them go, and yearn and search for them the way people do with old lovers, hoping to find them and rekindle that old spark. In Resurrecting Bertha, Rob Siegel assures you that this is normal (well, as normal as anything is with car people), and embarks on this journey himself. Writing in his trademark Hack Mechanic voice that's enthralled readers for 35 years, Rob describes his original eight-year relationship with his highly-modified 1975 BMW 2002 "Bertha," selling the car to a dear friend, its 26 years of storage, and buying it back in a weak whisky-soaked moment only to experience the "oh dear God what did I just do" regret when he raises the long-closed garage door and comes face-to-face with the badly deteriorated car. The book details the steps Rob went through to get the car running, then driving, then sufficiently sorted to make a 2000-mile drive, and how the reconnection with the car was so much deeper than he expected. Resurrecting Bertha is about more than just the nuts and bolts; it's about deciding what's important, the joy of doing good, and how, if you do it right, not only can you go home again, but you can do so in the same car.

Slave Stealers - Timothy Ballard 2018-09-04 Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, Incidents in the Life of a Slave Girl, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.
