When he was younger, he struggled with anxiety and other mental health issues, as do so many others in rural communities. A simple social media post helped him to turn things around.

After he shared a photo on Instagram showing himself naked in a truck full of lentils, he received a huge response, with other farmers wanting to share their own photos - and their stories. As the Naked Farmer movement grew, Ben met people from all around the country who wanted to get naked for mental health. As they got their kits off, they also opened up about their struggles. This is a heartwarming, moving and candid collection of stories of the challenges our farmers are facing,

and the way these communities are banding together in response.

Shaping World Architecture examines Sir Banister Fletcher's A History of Architecture on the Comparative Method and 120 years of reactions to this classic book. From Victorian England and the British Empire, through two World Wars and into 20th

century postcolonial landscapes, it shows how 'Banister Fletcher' can be used as a lens to explore the mechanisms of architectural history, global knowledge exchange, and the emergence of regional architectural histories. This is a book about the translation of architectural ideas in a global context and how generations of historians and architects responded to Fletcher's analyses, as much as it is about Banister Fletcher's book itself. Featuring new archival research and intriguing anecdotes, it probes the dissemination of the multiple editions

'Banister Fletcher' worldwide. It demonstrates how early editions of the book created a two-way transfer of knowledge between Fletcher and his readers in Asia, North America, and Europe, and how their invigorated search for new forms of architectural evolution charted a significant milestone in the development of regional histories of architecture. Carefully balancing responses to 'Banister Fletcher' – both favourable and fiercely critical – this book offers a re-reading of a classic text that is still read worldwide today, and provides insights for students into interpreting key texts of architectural

history. Shaping World Architecture is valuable for all scholars and researchers interested in the history and historiography of world architecture, and in the methodologies of architectural history. Maximum Boost Macmillan Publishers Aus. For over 25 years Rob Siegel has written a monthly column called "The Hack Mechanic" for the BMW Car Club of America's magazine Roundel. In Memoirs of a Hack Mechanic, Rob Siegel shares his secrets to buying, fixing, and driving cool

cars without risking the kids' tuition money or destroying his marriage. And that's something to brag about considering the dozens of cars, including twenty-five BMW 2002s, that have passed through his garage over the past three decades. With a steady dose of irreverent humor, Memoirs of a Hack Mechanic blends car stories, DIY advice, and cautionary tales in a way that will resonate with the car-obsessed (and the people who love them). The sport compact performance market is hot and getting hotter - and while the Honda Civic and Acura Integra have long been the dominant players in the market, a newcomer is emerging as a popular car for performance modifications - The Ford Focus. Well-built, inexpensive, good looking, and easy to modify, the Focus is quickly catching the Hondas in terms of market popularity. This book shows Focus owners exactly what it takes to improve their car's performance, from simple

modifications like installing a new air intake to radical mods like installing a turbocharger. The author also shows what those modifications can do, with before-and-after dyno tests for each modification. There's also extensive info on suspension and brake modifications for better handling and braking. It's a one-stop shop for those who want a sharper, faster Focus. Shaping World Architecture

By the early 1960s, the Ford Motor Company, built to bring automobile transportation to the masses, was falling behind. Young Henry Ford II, who had taken the reins of his grandfather's company with little business experience to speak of, knew

he had to do something to shake things up. Baby boomers were taking to the road in droves, looking for speed not safety, style not comfort.

Meanwhile, Enzo Ferrari, whose cars epitomized style, lorded it over the European racing scene. He crafted beautiful sports cars, "science fiction on wheels," but was also called "the Assassin" because so many drivers perished while racing them. Go Like Hell tells the

remarkable story of how Henry Ford II, with the help of a young visionary named Lee Iacocca and a former racing champion turned engineer, Carroll Shelby, concocted a scheme to reinvent the Ford company. They would enter the high-stakes world of European car racing, where an adventurous few threw safety and sanity to the wind. They would design, build, and race a car that could beat Ferrari at his own game at the most

prestigious and brutal race in the world, something no American car had ever done. Go Like Hell transports readers to a risk-filled, glorious time in this brilliant portrait of a rivalry between two industrialists, the cars they built, and the "pilots" who would drive them to victory, or doom.
