Known as the "Thunderbolt", Republic's F-105 Thunderchief entered service in 1958, and flew in a variety of roles through 1984. The largest single-engine fighter in the U.S.A.F. inventory, the F-105 could exceed Mach 1.0 at sea level, and achieve Mach 2.0 at high altitude. It could carry up to 14,000 pounds of ordnance, or about as much as most WWII heavy bombers. The F-105 served as the primary strike aircraft in the early years of the Vietnam conflict, and its pilots flew over 20,000

missions. These included "wild weasel" flights intended to suppress North Vietnamese air defenses. The dangerous aspects of these missions help account for the aircraft's high loss rate - out of 833 F-105s produced, 320 were lost in combat in S.E. Asia. Originally printed by the U.S. Air Force, this handbook provides a fascinating glimpse inside the cockpit of one of history's great planes. Classified "Restricted", the manual was declassified and is here reprinted in book form.

"Engineers" Martin B. Brown Company
TW Index is a complete and detailed index of everything that has appeared in the SDC Turning Wheels magazine since its inception in 1972. Of greatest importance are the advice items that are indexed by subject (engines, brakes, steering, etc.), model AND year including all individual letters that appear in the Co-Operator column. Historical items are also indexed by subject as well as by the vehicle (model and year) they

relate to. If you own, for instance, a 1959 Hawk, TW Index will give you instant access to everything that has been published about your car and much more. Each listing, of course, refers you to the specific issue of "Turning Wheels" and cites the page on which the item begins. Rated "excellent" by Fred Fox and Bob Palma. Volume 1 of Turning Wheels Index includes issues of Turning Wheels from 1972 through 1992 with 10,711 references on 159 pages. Volume 2 of Turning Wheels

Index includes 1993 through 2009 with 9,995 references on 158 pages.
