**Billboard** Macmillan

When puppies Lindie Lou, Jasper, Topaz, Ruby and Diamond are born in St. Louis they have no idea of the adventures that await them. As each of them is adopted by a different family, Lindie Lou fears she will never see them again. When she's old enough, Lindie Lou flies to the Emerald City (Seattle) to meet her new family. Each of the twelve books projected for this series, takes place in a different place and in a different month of the year. Three clues at the end of each book give the reader hints as to where Lindie Lou will go on her next adventure. This beginning chapter book series, introduces young readers to adventures in St. Louis at the City Museum, at the Space Needle in Seattle, at an organic farm in Des Moines, at a Thanksgiving Day parade in New York, and at a Cherry Blossom Festival in Japan to mention a few. Along the way, Lindie Lou's brothers and sisters show up when least expected. Readers will remember Lindie Lou's bravery when faced with fears of their own. They will also see examples of her developing self-esteem, courage, determination and compassion. Creative fonts,

color illustrations, and short chapters provide a series that is a bridge between early chapter books and novels. The Lindie Lou Adventures Series has proven to be a favorite classroom read aloud, safe for young fluent readers, the first chapter book read by Hi-Lo readers, and a winner for ELL students.

Arthritis v. 4 pt. 3

Monthly magazine devoted to topics of general scientific interest.

The Wisconsin Agriculturist

Instant New York Times Bestseller As the fiftieth anniversary of the first lunar landing approaches, the award winning historian and perennial New York Times bestselling author takes a fresh look at the space program, President John F. Kennedy's inspiring challenge, and America's race to the moon. "We choose to go to the Moon in this decade and do the other things, not because they are easy, but because they are hard; because that goal will serve to organize and measure the best of our energies and skills, because that challenge is one that we are willing to accept, one we are unwilling to postpone, and one we intend to win." —President John F. Kennedy On May 25, 1961, JFK made an astonishing announcement: his goal of putting a man on the moon by the end of the decade. In this engrossing, fast-paced epic, Douglas Brinkley returns to the 1960s to recreate one of the most exciting and ambitious achievements in the history of humankind. American Moonshot brings together the extraordinary political, cultural, and scientific factors that fueled

the birth and development of NASA and the Mercury, Gemini and Apollo projects, which shot the United States to victory in the space race against the Soviet Union at the height of the Cold War. Drawing on new primary source material and major interviews with many of the surviving figures who were key to America's success, Brinkley brings this fascinating history to life as never before. American Moonshot is a portrait of the brilliant men and women who made this giant leap possible, the technology that enabled us to propel men beyond earth's orbit to the moon and return them safely, and the geopolitical tensions that spurred Kennedy to commit himself fully to this audacious dream. Brinkley's ensemble cast of New Frontier characters include rocketeer Wernher von Braun, astronaut John Glenn and space booster Lyndon Johnson. A vivid and enthralling chronicle of one of the most thrilling, hopeful, and turbulent eras in the nation's history, American Moonshot is an homage to scientific ingenuity, human curiosity, and the boundless American spirit.

Engineering Review

The fourth estate.

Billboard

"In this remarkable journey, Mark Woods captures the essence of our National Parks: their serenity and majesty, complexity and vitality--and their power to heal." --Ken Burns Many childhood summers, Mark Woods piled into a station wagon with his parents and two sisters and headed to America's national parks. Mark's most vivid childhood memories are set against a backdrop of mountains, woods, and fireflies in places like Redwood, Yosemite, and Grand Canyon national parks. On the eve of turning fifty

---

and a little burned-out, Mark decided to reconnect with the great outdoors. He'd spend a year visiting the national parks. He planned to take his mother to a park she'd not yet visited and to re-create his childhood trips with his wife and their iPad-generation daughter. But then the unthinkable happened: his mother was diagnosed with cancer, given just months to live. Mark had initially intended to write a book about the future of the national parks, but *Lassoing the Sun* grew into something more: a book about family, the parks, the legacies we inherit and the ones we leave behind.
