Slow Blind Drive is a conversation with the dead. A letter to an unlikely muse and a testament to the resilience of unconditional love. All at once haunting and horrific, erotic and endearing, this is the story of what it means to grow up a girl, to find solace in addiction, to have everything and give it away. It's a raw and sentimental account that follows a childhood friendship as it thrives and suffers through an intimate love, drug addiction, mental illness and betrayal. This is a story whose characters stay with you long after you've turned the last pages.

In the Twentieth Century Albert Einstein and others made some astonishing discoveries. They showed us how our universe could start with a Big Bang which seems to allow something to appear from nothing, that Space can be curved and why there may have been

a time when there was no Time. If you have always been absolutely baffled by anything related to Space-time then this book is for you. My writing mission is to engage with a new audience that has no previous knowledge of science, and I go to great lengths (without any equations) to make sure that everybody can fully understand my explanations. Unfortunately, Space-time has a reputation for being difficult. The first thing I will do is show that this claim is false. In this book nothing is too hard to understand and I will also encourage you to participate in the scientific process. Don't worry, you are not going to need your own laboratory; everything can be done in the comfort of your own home with Thought Experiments.
