What can you get with \$25 and a dream? Adam Shepard graduated from college feeling disillusioned by the apathy around him and was then incensed after reading Barbara Ehrenreich's famous work Nickel and Dimed—a book that gave him a feeling of hopelessness about the working class in America. He set out to disprove Ehrenreich's theory—the notion that those who start at the bottom stay at the bottom—by making something out of nothing to achieve the American Dream. Shepard's plan was simple. With a sleeping bag, the clothes on his back, and \$25 in cash, and restricted from using his contacts or college education, he headed out for Charleston, South Carolina, a randomly selected city with one objective: to work his way out of homelessness and into a life that would give him the opportunity for success. His goal was to have, after one year, \$2,500, a working automobile, and a furnished apartment. Scratch Beginnings is the earnest and passionate account of Shepard's struggle to overcome the pressures placed on the homeless. His story will not only inspire readers but will also remind them that success can come to anyone who is willing to work hard—and that America is still one of the most hopeful countries in the world.

When installing or servicing an air conditioning or refrigeration system, two of the most important tasks performed by technicians are refrigerant recovery and system evacuation. In order to perform these tasks properly, and in a safe manner, technicians need to understand the theory behind them, having a working knowledge of the equipment and tools used, and employ accepted industry best practices. This e-book walks through each step of both tasks, while covering safety, theory, and application. Also covered are leak detection methods and filter drier use. System Recovery and Evacuation was written by HVACR instructors for HVACR instructors to provide sound, relevant information in a single source. This e-book provides students and practicing technicians with the information and knowledge necessary to understand refrigerant recovery, system evacuation, leak detection, and filter driers. It is full of color illustrations and includes worksheets that provide students and practicing technicians with the information and knowledge necessary to accurately and safely install or service air conditioning and refrigeration systems. The end of the e-book contains fill-in-the-blank questions that review the content of the entire manual.

"Messages, Signs, and Meanings can be used directly in introductory courses in semiotics, communications, media, or culture studies. Additionally, it can be used as a complementary or supplementary text in courses dealing with cognate areas of investigation (psychology, mythology, education, literary studies, anthropology, linguistics). The text builds upon what readers already know intuitively about signs, and then leads them to think critically about the world in which they live - a world saturated with images of all kinds that a basic knowledge of semiotics can help filter and deconstruct. The text also provides opportunities for readers to do "hands-on" semiotics through the exercises and questions for discussion that accompany each chapter. Biographical sketches of the major figures in the field are also included, as is a convenient glossary of technical terms." "The

overall plan of the book is to illustrate how message-making and meaning-making can be studied from the specific vantage point of the discipline of semiotics. This third edition also includes updated discussions of information technology throughout, focusing especially on how meanings are now negotiated through such channels as websites, chat rooms, and instant messages."--Jacket.
