Donald Martin Brockway founded the Crown Carriage Company in 1904, the same year that Henry Ford started Ford. With no engineering department at this time, Brockway would draw the outlines of the vehicles in the dirt on the production floor as they were conceived. This informative story of Crown's various endeavors from 1900s horse-drawn wagons through early 1990s alternative fueled buses is chronicled here and highlighted with vintage photographs and factory memorabilia including advertising items, coach emblems, and production statistics. Not left out are custom built

coaches like Lockheed's mobile missile tacking station, Art Linkletter mobile video coaches, and the first air conditioned tour coach in Hawaii. Stock car racing in the 1960s featured intense behind the scenes battles between the factories, rules makers, track owners, promoters, and racing teams. Everyone was trying to keep up with the rapid year-to-year changes that brought more cubic inches, more horsepower, smoother shapes, and faster

cars. The fans were the beneficiary as they were treated to incredible competition and incredible race cars. The '60s were a sensational era of stock car racing that will never be seen again. Factory engineers produced wild and powerful stock cars that raced in shootouts from Southern dirt and small ovals to bigger and bigger super-speedways. The racer's edge sought by each factory led one small team after another to pack up and pull out. This was the era of back-door racer support from General Motors, Ford's "Total Performance" agenda to win everything, and Chrysler's fantastic Hemi-powered stockers. Special racing engines and exotic prototypes with advanced concepts that never saw the light of day all added up to fantastic drama and incredible racing, all told in these pages.

Now in paperback, this book covers Chrysler's incredible series of muscle cars. In 1955 Chrysler introduced the first of its famed 300 "letter series" cars. The company designed a stylish, sporty car, stuffed in one of its

potent Hemi engines, and gave birth to the American muscle car. The C-300's combination of style and performance put the Mopar brand ahead of its competitors in the postwar performance race. When the Detroit performance wars began in earnest during the 1960s, Chrysler was well positioned to build the most outrageous, bodacious cars of an outrageous, bodacious era, cars like the famed Charger, Hemi Cuda, Road Runner, Superbird, and Challenger T/A. These cars dominated the dragstrips as well as the NASCAR ovals, and with color combinations guaranteed to burn out the corneas of your eyes if you stared at them directly, they ruled the streets of America; they ruled not just the streets, but the drive ins and parking lots. Nothing was cooler than Mopar muscle. Over the years these legendary Mopar muscle cars were the fastest, baddest assed, most outrageous machines to rip up American pavement. "This lavishly produced book is definitely a feast for all fans of this line of cars: the photography (by David Newhardt) is absolutely stunning. Not only are the pictures big, and of the highest quality, but the thought that has gone into their composition is plain for all to see. It could be argued that given the striking nature of these cars, and the wonderful backdrops, it would be hard to go wrong, but Newhardt went the extra mile here, and it shows. The story is also very comprehensive, listing all of the cars from the line, and taking time to tell the story in a well-researched, yet caring way. It is obvious that Robert Genat knows the subject well and loves it even more. . . . This book is a must-have for all lovers of American muscle, and thanks to the sheer depth of its coverage and drop-dead-gorgeous photography, the asking price of £34.99 is something of a bargain." - Classic Car Weekly (UK)
