"This pioneering study of United States direct investment in Japan will interest academic

specialists, business managers, and government policymakers in America, Japan, and elsewhere. Drawing on rich historical materials from both sides of the Pacific, including corporate records and government documents never before made public, Mason examines the development of both Japanese policy towards foreign investment and the strategic responses of American corporations. This history is related in part through original case studies of Coca-Cola, Dow Chemical, Ford, General Motors, International Business Machines, Motorola, Otis Elevator, Texas Instruments, Western Electric, and Victor Talking Machine. The book seeks to explain why a little foreign direct investment has entered modern Japan. In contrast to the widely held view that emphasizes an alleged lack of effort on the part of foreign corporations, this study finds that Japanese restrictions merit greater attention. Many analysts of the modern Japanese

political economy identify the Japanese government as the key actor in initiating such restrictions. Mason finds that the influence of Japanese business has often proved more potent than these analysts suggest. This book offers fresh insights into both the operation of the modern Japanese political economy and of its relations with the world economy."

From the resumption of automobile production at the close of World War II through the 1950s, the American auto industry would see the births and deaths of several manufacturers, great technological advances, and an era of dramatic styling as a

prospering nation asserted its growing mobility. Cars of this period are among the most iconic vehicles ever built in the United States: the 1949 Ford, the remarkable Studebaker designs of 1950 and 1953, the 1955-1957 Chevrolets, the "Forward Look" Chrysler products, the ill-fated Edsel and many others. This comprehensive reference book details every model from each of the major manufacturers (including independents such as Kaiser-Frazer and Crosley but excluding very low-volume marques such as Tucker) from model years 1946 through 1959. Year by year, it provides an overview of the industry and market, followed by an individual report on each company: its main news for the year (introductions or cancellations of models, new engines and transmissions, advertising themes, sales trends etc.); its production figures and market status; and its powertrain offerings, paint colors and major options. The company's models are then detailed individually with such information as body styles, prices, dimensions and weights, standard equipment and production figures. Nearly 1,000 photographs are included.

And yet whatever we have is, in a very profound way, absolutely complete and always enough."—Kyogen Carlson Kyogen Carlson (1948–2014) was a Soto Zen priest whose writings, teachings, and commitment to interfaith dialogue supported and inspired countless

Buddhist, Christian, and other spiritual practitioners. Set to the rhythm of the seasons, *You Are Still Here* is the first published collection of Carlson's dharma talks. It illuminates key elements of contemporary Zen practice, such as the experience of zazen meditation, the pitfalls and intimacies of the teacher-student relationship and of sangha life, the role of community in personal practice, and the importance of interfaith dialogue reaching across political lines. Carlson's teachings also underscore his commitment to lay Buddhist practice and women's lineages, both significant contributions to American Buddhism. The beautifully distilled talks have been carefully edited and introduced by Sallie Jiko Tisdale, a respected writer, teacher, and Dharma heir to Carlson. Her masterful presentation highlights the significance of these illuminating teachings, while preserving Carlson's distinct style of authenticity, humor, and conviction on the Zen path.

And why, given Durant's impact, has he been nearly forgotten for decades? In search of answers to these questions, Lawrence Gustin interviewed Durant's widow, who provided a wealth of previously unpublished autobiographical notes, letters, and personal papers. Gustin also interviewed two of Durant's personal secretaries and others who had known and worked with the man who created General Motors. The result is the amazing account of the mastermind behind what would become, as the twentieth century progressed, the world's largest company.
