In Comeback, Pulitzer Prize-winners Paul Ingrassia and Joseph B. White take us to the boardrooms, the executive offices, and the shop floors of the auto business to reconstruct, in riveting detail, how America's premier industry stumbled, fell, and picked itself up again. The story begins in 1982, when Honda started building cars in Marysville, Ohio, and the entire U.S. car industry seemed to be on the brink of extinction. It ends just over a decade later, with a remarkable turn of the tables, as Japan's car industry falters and America's Big Three emerge as formidable global competitors. Comeback is a story propelled by larger-than-life characters -- Lee Iacocca, Henry Ford II, Don Petersen, Roger Smith, among many others -- and their greed, pride, and sheer refusal to face facts. But it is also a story full of dedicated, unlikely heroes who struggled to make the Big Three change before it was too late.

Making horsepower at Chrysler in the early 1960s was nothing new for the Pentastar brand. The 413 RB engine had been producing more than 350 hp since the late 1950s. Joining the lineup in 1963, the 426 Wedge doubled down on the fact that Chrysler was all-in on going fast. The one weakness holding them back from total domination on the streets and strips was with their dated and tired manual shifter, the BorgWarner T-10 transmission. That all changed with the advent of its replacement, the New Process A-833. Jamie Passon of Passon Performance has used his decades of knowledge on the A-833 to create the ultimate book on

rebuilding a Chrysler 4-speed. He begins with a historical overview of the long-tenured A-833 and jumps into dissecting what could be malfunctioning in your transmission. The bulk of the book concentrates on disassembling, inspecting, repairing, and reassembling the A-833. With 400 photos, the author shows you exactly how to rebuild your transmission featuring how-to sequences that walk you through each phase. Whether you own a Polara, Road Runner, Challenger, or Ram truck, you need to have the confidence that your transmission is in top-notch, working condition. Now is the time to eliminate that annoying grind when you put your Mopar into reverse. You can pull out your A-833 and tear into it with this valuable resource.

Learn how to build an affordable hot rod following the advice of the masters! In How to Build Affordable Hot Rods, author and lifelong hot rod aficionado Tony Thacker takes you through the process of building a hot rod on a budget. Drawing on his own extensive experience of both buying and building rods, Thacker explores the good, the bad, and the ugly. The good was setting a land speed record at Bonneville, the bad was buying a rod from which the previous owner had "swapped out" the good engine, and the ugly--well, let ' s just not go there. How to Build Affordable Hot Rods includes extensive how-to sections that cover step-by-step chassis builds for Model A, 1932, and 1936 Fords, including front- and rear-end setups. The in-depth chassis builds are complimented with sections on powertrain choices, bodywork and roof chops, wheels and tires, and wiring and paint. Also included are chapters on interiors and the all-important details that individualize any project to ensure that it stands out from the rest. When Henry Ford introduced his beloved Model T, he unwittingly gave the average person the means to go racing. Prior to the T, racing was mostly a sport of the rich, but that changed with the Model T. Stripped of fenders and hopped up with speed parts, T speedsters ruled, and it wasn ' t long before enthusiasm on the track translated to the street and the term hot rod entered the vernacular. Of course, it didn ' t need to be a Ford (and still doesn ' t), but the easiest and therefore cheapest route to Hot Rod Boulevard is down the Ford road. The journey accelerated after World War II, as hot rodding boomed with the growth of speed shops, car shows, drag racing, talented and trained GIs returning home, and the launch of Hot Rod magazine to spread the gospel far and wide. More than 100 years after the original Model T, hot rodding remains alive and well in the Australasia, Europe, and (of course) its birthplace the US.

"I have always had faith that the best writers will rise to the top, like cream, sooner or later, and will become exactly as well-known as they should be-their work talked about, quoted, taught, performed, filmed, set to music, anthologized. Perhaps, with the present collection, Lucia Berlin will begin to gain the attention she deserves." -Lydia Davis
A MANUAL FOR CLEANING WOMEN compiles the best work of the legendary short-story writer Lucia Berlin. With the grit of Raymond Carver, the humor of Grace Paley, and a blend of wit and melancholy all her own, Berlin crafts miracles from the everyday, uncovering moments of grace in the Laundromats and halfway houses of the American Southwest, in the homes of the Bay Area upper class, among switchboard operators and struggling mothers, hitchhikers and bad Christians. Readers will revel in this remarkable collection from a master of the form and wonder how they'd ever overlooked her in the first place.
