From a mysterious cave high in the Barrier Peaks, they come: savage raiders of unknown origin laying waste to castle and keep,

leaving no survivors. The land is in turmoil and only a band of stalwart heroes dares to launch an expedition into the soaring mountains to stamp out this vile menace. What they discover in those lofty peaks is something beyond their comprehension. A danger spawned from the very stars above. A crashed starship, buried for centuries beneath the Barrier Peaks, has awoken, and now its alien inhabitants--crazed robots, eerie androids, and even stranger things--endanger

To the End of the Earth tells thrilling true adventure of a deadly trek to the North Pole, a 100 year old mystery and an inspiring tale of polar exploration April 2009 is the one-hundredth anniversary of perhaps the greatest controversy in the history of exploration. Did U.S. Naval Commander Robert Peary and his team dogsled to the North Pole in thirty-seven days in 1909? Or, as has been challenged, was this speed impossible, and was he a cheat? In 2005, polar explorer Tom Avery and his team set out to recreate this 100-year-old journey, using the same equipment as Peary, to prove that Peary had indeed done what he had claimed and discovered the North Pole. Navigating treacherous pressure ridges,

---

deadly channels of open water, bitterly cold temperatures, and traveling in a similar style to Peary's with dog teams and replica wooden sledges bound together with cord, Avery tells the story of how his team covered 413 nautical miles to the North Pole in thirty-six days and twenty-two hours—some four hours faster than Peary. Weaving fascinating polar exploration history with thrilling extreme adventure, this is Avery's story of how he and his team nearly gave their lives proving Peary told the truth.

This book provides an integrated, thorough and up-to-date review of the nature and development of the Kalahari environment, an environment of great ecological and geomorphological diversity. Its complex

climatic and geological history and its long association with human societies attempting to utilise its natural resources are aspects of increasing scientific interest. The book has evolved from the authors' own research in the Kalahari, and attempts to provide explanations and answers to some of the many questions raised about this region, ranging from the commonly asked 'is it really a desert?', to more specific and detailed concerns. The interdisciplinary approach will make the book of interest to researchers, lecturers and advanced students in earth sciences, environmental studies, tropical geomorphology and Quaternary science. The extensive bibliography will also
