From the creator of the TV show *Bones* comes a smart and funny debut thriller. "Everything a great thriller should be—always smart, often funny, and relentlessly exciting. I loved every page."—Scott Turow Michael Skellig is a limo driver waiting for his client in the alley behind an upscale hotel. He's spent the past twenty-eight hours ferrying around Bismarck Avila, a celebrity skateboard mogul who isn't going home any time soon. Suddenly the wind begins to speak to Skellig in the guttural accent of the Chechen torturer he shot through the eye in Yemen a decade ago:

Troubletroubletrouble. Skellig has heard these warnings before—he's an Army Special Forces sergeant whose limo company is staffed by a ragtag band of wounded veterans, including his Afghan interpreter—and he knows to listen carefully. Skellig runs inside just in time to save Avila from two gunmen but too late for one of Avila's bodyguards—and wakes up hours later in the hospital, the only person of interest in custody for the murder. Complicating matters further is the appearance of Detective Delilah Groopman of the LAPD, gorgeous and brash, for whom Skellig has always held a candle. As for Avila? He's willing to help clear Skellig's name under one peculiar condition: that Skellig become Avila's personal

chauffeur. A cushy gig for any driver, except for the fact that someone is clearly trying to kill Avila, and Skellig is literally the only person sitting between Avila and a bullet to the head.

With the discovery of a fossil on Mars and the threat of an asteroid heading for Earth, a frustrated American President is forced to reconsider his legacy. He decides to do something big for humanity, and orders the first manned mission to Mars. Surmounting seemingly impossible hurdles, the maverick scientist Ford Harris discovers how to make it happen. There is one crucial problem: the weight of any ordinary crew would be too great for the rocket to return home. And so Ford proposes a bold new idea – replacing

the adult crew with a group of gifted children. An exciting and fascinating story, featuring beautiful illustrations and informative scientific notes, *The Other Things* explores our sense of wonder. Are we alone in the universe? How do we make our existence count? And what could still be possible for humankind?

Take an instantly recognizable social dilemma—attending a wedding alone—add a good laugh (and maybe a cry), and meet *The Singles*, the warm and witty debut by Boston Globe “Love Letters” columnist Meredith Goldstein.

Beth “Bee” Evans’s first vow as a bride is that everyone on her list be invited to bring a guest to her lavish, Chesapeake Bay nuptials. When Hannah, Vicki, Rob, Joe, and Nancy one by one decline Bee’s generous offer, the frustrated bride dubs them the “Singles,” adrift on her seating chart as well as in life.

Sixty Feet, Six Inches Unbound Publishing Engineers looking for an accessible approach to calculus will appreciate Young’s introduction. The book offers a clear writing style that helps reduce any math anxiety they may have while developing their problem-solving skills. It incorporates Parallel Words and Math boxes that provide detailed annotations which follow a multi-modal approach. Your Turn exercises reinforce concepts by allowing them to see the connection between the exercises and

examples. A five-step problem solving method is also used to help engineers gain a stronger understanding of word problems.

Major new tax laws aimed at boosting

the economy, addressing rising health care costs and providing tax relief have created numerous tax planning opportunities-and challenges. Tax rates and other changes that phase in and phase out between now and 2010 make mid- and long-term financial planning difficult and more tax-driven than ever before. Sound tax guidance and planning is essential to maximize many of the available tax benefits and avoid tax pitfalls.

Recent academic research findings on topics relating to taxation and social insurance policy, including the implicit tax imposed by Medicaid on private long-term care insurance benefits, an

alternative system of unemployment insurance, and federal energy tax policy. This NBER series presents current academic research findings in the areas of taxation and government spending. The papers included provide important background information for policy analysts in government and the private sector without making specific policy recommendations. This twenty-first installment in the series reports on recent research concerning both taxation and social insurance policy. The papers discuss Medicaid's implicit tax on the benefits of private long-term care insurance, an alternative to current unemployment insurance systems, the tax treatment of health insurance

expenditures, the effective marginal tax rates on labor supply and saving, and the rationale for and effect of energy-related tax policies.

MotorBoating John Wiley & Sons Thermoplastics and Thermoplastic Composites, Third Edition bridges the technology and business aspects of thermoplastics, providing a guide designed to help engineers working in real-world industrial settings. The author explores the criteria for material selection, provides a detailed guide to each family of thermoplastics, and explains the various processing options for each material type. More than 30 families of thermoplastics are described with information on their advantages and drawbacks, special grades, prices, transformation processes,

applications, thermal behavior, technological properties (tenacity, friction, dimensional stability), durability (ageing, creep, fatigue), chemical and fire behavior, electrical properties, and joining possibilities. In this third edition, standards and costs have been updated for all materials, and more information on topics such as bioplastics, 3D printing and recycling have been added. In addition, an entirely new chapter on the concept of 'Industry 4.0' has been added, with guidance and suggestions on the incorporation of virtualization, connectivity, and automation into the plastics engineering process to reduce materials and processing failure. Includes detailed case studies that illustrate best practices across a wide range of applications and

industry sectors Presents a new chapter on the 'Industry 4.0' concept Suggests software solutions to assist with design, decision-making and management, along with other forms of automation

These articles were chosen with an eye to exposing readers to a wide range of subjects, from workforces issues such as worker exploitation and employee benefits to the future of oil production, and the impact of deregulation on the utility industry, and beyond to the new global economy with the formation of the European Monetary Union and other world trade developments.

!--description-- Economic Issues is a collection of 20 recent articles from The CQ Researcher — winner of the 1999 Sigma Delta Chi Award for distinguished service in journalism from the Society of Professional Journalists and one of the most respected sources for research in

current issues. Students, interested citizens, government and business leaders and others will find in these pages reliable and complete information on a wide range of topics. These selections, in the tradition of nonpartisan reporting and analysis that is the hallmark of Congressional Quarterly, present readers with balanced accounts of issues on the economic front. CQ staff writers provide background as well as current analysis. A pro-and-con feature for each article sparks classroom discussion, while an annotated bibliography points interested readers to additional sources. Each selection also incorporates the voices of people in the thick of the policy process: people from lobbies, nonprofits, think tanks, academia and government.
