Language Central for Math helps ELLs and struggling students develop the academic vocabulary necessary to master math. Oftentimes it's the math vocabulary, not the mathematical concepts, that hinder student mastery. Language Central for Math is designed to directly address this issue - and to reinforce the instruction given in the math classroom. The curriculum that serves as the foundation of the program was developed by Fitchburg Public School District (MA), with a goal to provide better Mathematics access to its growing ELL population. Language Central for Math incorporates this curriculum within an ELL instructional framework developed by Dr. Jim Cummins, Pearson Advisor and Professor at Univ of Toronto. The program was designed for easy and flexible implementation: It supplements any core math program. Each lesson can be used either: 1 class/ week (ESL class) or 15-20 minutes/day (before each math class).

Advanced bionanocomposite materials continue to be increasingly popular and are important for a wide range of scientific and engineering applications. In the race to exploit the unique mechanical, thermal, and electrical properties of bionanocomposite materials, researchers need to address new challenges in predicting, understanding, and managing the potentially adverse effects these materials could have on the environment and human life. This book focuses on the fundamentals of bionanostructured materials and bionanocomposites. It deals with some recent developments in the synthesis and characterization of bionanomaterials as well as their incorporation into polymer matrixes. The biological applications of bionanomaterials are also discussed in detail, along with the synthesis of bionanostructured materials and bionanocomposites, reviews of food packing, water remediation, heavy metal ion adsorption from wastewaters, and other industrial applications. This book is aimed at beginners in this field as well as advanced undergraduate- and graduate-level students of materials science and researchers working in the fields of bionanocomposites, nanotechnology, and analytical chemistry, especially those with an interest in materials for analytical applications.
