Thomas Nelson

The story of Chesapeake pirates and patriots begins with a land dispute and ends

with the untimely death of an oyster dredger at the hands of the Maryland Oyster Navy. From the golden age of piracy to Confederate privateers and oyster pirates, the maritime communities of the Chesapeake Bay are intimately tied to a fascinating history of intrigue, plunder and illicit commerce raiding. Author Jamie L.H. Goodall introduces infamous men like Edward "Blackbeard" Teach and "Black Sam" Bellamy, as well as lesser-known local figures like Gus Price and Berkeley Muse, whose tales of piracy are legendary from the harbor of Baltimore to the shores of Cape Charles.

Some have said that if God had wanted us to

fly, He would have given us wings. And yet, we were given the ability to dream, to think with our heads, to have courage in our hearts, and to build with our hands. Truly, we have been given everything we need: We really can fly on our own wings! Chris Heintz is a professional aeronautical engineer with a prolific career spanning over 40 years designing and building light aircraft. Recognized worldwide as a uniquely talented and accomplished designer, his aircraft are known and appreciated for their simplicity of construction, pilot-friendly cabins and controllability as well as remarkable performances. Today, Chris Heintz designs are flown throughout the world, mostly by

recreational pilots who have assembled their own planes from a kit. His most popular models are also factory-assembled and sold as ready-to-fly sport aircraft on three continents. In **FLYING ON YOUR OWN WINGS**, Mr. Heintz shares his knowledge and insights into the art and science of light aircraft design. He “walks” readers through the essential understanding and skills required to conceive, develop, build and even test-fly their own personal light airplane. Basic mathematics, essential aerodynamics and stress analysis are just a few of the chapters of this fascinating book. Heintz even provides a sample design to help would-be designers take their first step towards

imagining and creating their own wings. Truly a beginner ' s guide to everything you need to know in order to achieve that age-old dream: To fly on your own wings!

Ferrari Fever is a fascinating and nostalgic look back at the classic car collecting scene in the 60's

and 70's, an era when some of the rarest and most interesting Italian automobiles could still be found hidden or languishing in barns, junkyards or by the side of the road...almost lost in time. Paul Schouwenburg s story begins in wartime occupied Amsterdam, a poignant backdrop to the hardships of the years to follow, when the appearance of any exotic Italian thoroughbred was a rare sight indeed. Fuelled by a fascination for all things mechanical, adventures on a Rudge bicycle and early experiences in his parents succession of Rovers, Paul gains a burning passion for finding, restoring, and ultimately racing Italian cars. But these were not just any Italian cars -from the early 60s onwards, he begins to uncover several rare Alfas, from 1900CSS Zagato to Tipo 33/2, in addition to a host of very special Ferraris, including a

250GTO, 340 America Touring, 250 MM Vignale Berlinetta, 250GT SWB Competition/61 and 275GTB/C/LM, usually by word of mouth or tenuous rumour. Having acquired them, often many different models at a time, he would drive them home across Europe through snow storms, and restore them single-handedly in his spare time, full-time job as a world-leading head and neck cancer surgeon permitting! If that wasn't exciting enough, he would then race them, often winning, before moving on to the next irresistible project. Filled with rich anecdotes and rare insights into the colourful characters of the day, including Jacques Swaters and Rob de la Rive Box, Paul's passion and incredible drive make for exciting reading. Indeed this is a unique take, a look in the rear view mirror at a bygone era when gems

could be found incredibly cheaply and enthusiasts took seat-of-the-pants decisions regarding many aspects of a hobby which was uncharted, innocent and simply not as commercial as today he couldn't even give away his 250 GTO at the time!

Boating Life
Ker-SPLASH! is an up-to-date, comprehensive look at the hobby and sport of recreational boating and water skiing. It is intended as a guide for both the neophyte and the experienced recreational power boater. The book includes detailed instructions for: (1) Selecting and buying a boat; (2) Making an intelligent engine choice; (3) Selecting boating accessories; (4) Choosing skis, boards,

and towables; (5) Selecting a personal slalom ski; (6) Learning to ski and towing a skier; (7) Learning to slalom; (8) Riding and towing other water toys; and (9) Maintenance and safety issues. Ker-SPLASH! covers these types of recreational powerboats: sterndrive runabouts, tournament ski boats, mini-jet boats, personal watercraft, offshore performance boats, deck and pontoon boats, outboard ski boats, fish 'n' ski boats, and cuddy cabins. Comparative descriptions and contact addresses of the major boat, ski, wakeboard, and accessory manufacturers are included. Ker-SPLASH is not only a reference guide, but it also includes down-to-earth information and entertaining boating

stories.
