Old campers have an appeal that reaches back in time and can send your imagination soaring. Let's face it: they are cool. Who hasn't seen one parked on a boulevard with a "for sale" sign and pictured it bouncing along behind the family car, ready for adventure and fun?

Unfortunately, campers are not quite homes, they are not quite cars, and they have their own unique systems and demands that make fixing and upgrading a challenge. Even if you have plenty of DIY experience, a camper speaks a foreign language. Consider Camper Rehab your Rosetta Stone for the language of Shasta, Dutchmen, or Airstream. This book is a top-to-bottom guide to getting a fifth-wheel, teardrop, or other camper trailer ready for the road and beyond. From basic troubleshooting to electrical and plumbing projects, replacing interior surfaces, and clever (sometimes "retro") decorating ideas, this book uses detailed illustrations, color photography, and a wealth of step-by-step, how-to information to get help you get your travel trailer into shape for your next big--or little--adventure. And in case you haven't pulled the trigger on that trailer you're eying on Craigslist just yet, Camper Rehab also walks you through the process of evaluating a potential purchase, identifying which issues are fixable and which are dealbreakers, as well as how to spot hidden problems. Written by accomplished DIY author Chris Peterson, whose light and approachable tone is coupled with the hardworking DIY information you need, Camper Rehab is a must-have for any camper owner or dreamer.

We took a low-mileage, ex-military, unregistered Series III Land Rover, stripped it down to its bare bones, and then blended it with an original Series III Station Wagon in very poor condition. After stirring into the pot a selection of new and modified parts from a number of different sources, we ended up with the most immaculate and user-friendly Series III you could imagine.

Here 's how you can restore or modify your own Series III, from suspension, brakes, and steering, to engine, transmission and body improvements. You want better seats? Galvanized chassis and bulkhead? Immaculately restored body and mechanical components? This manual has the answers. Featuring advice on rebuilding the rear body tub, the bulkhead, Station Wagon side frames, and much more besides, this book is a must!

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America 's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede 's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid 's, handle like a pro 's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension 's condition. He outlines testing procedures that will help you gauge how well you 're improving your suspension, along with your riding. And, if you 're inclined to perfect your bike 's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.
