The old masters dealt only with the static features of the positional rules of chess. But these are insufficient to explain the basics of chess. The problem is that chess, like in other sciences, has undergone a dynamic revolution, but chess literature doesn't yet reflect it. In this major work Aagaard accessibly explains the rules of attack (the exploitation of a dynamic advantage), balanced between understandable examples, and deep analysis. Five years in the making, this book deals with weak kings, sacrifices, various minor attacking themes, intuitive sacrifices, opposite castling, modern king hunts, and enduring initiative.

Information visualization is the act of gaining insight into data, and is carried out by virtually everyone. It is usually facilitated by turning data – often a collection of numbers – into images that allow much easier comprehension. Everyone benefits from information visualization, whether internet shopping, investigating fraud or indulging an interest in art. So no assumptions are made about specialist background knowledge in, for example, computer science, mathematics, programming or human cognition. Indeed, the book is directed at two main audiences. One comprises first year students of any discipline. The other comprises graduates – again of any discipline – who are taking a one- or two-year course of training to be visual and interaction designers. By focusing on the activity of design the pedagogical approach adopted by the book is based on the view that the best way to learn about the subject is to do it, to be creative: not to prepare for

the ubiquitous examination paper. The content of the book, and the associated exercises, are typically used to support five creative design exercises, the final one being a group project mirroring the activity of a consultancy undertaking a design (not an implementation) for a client. Engagement with the material of this book can have a variety of outcomes. The composer of a school newsletter and the applicant for a multi-million investment should both be able to convey their message more effectively, and the curator of an exhibition will have new presentational techniques on their palette. For those students training to be visual/interaction designers the exercises have led to original and stimulating outcomes.

Charisma Media

A "nuanced and insightful" (New Statesman) portrait of Britain's most famous female poet, a woman who invented herself and defied her times. "How do I love thee? Let me count the ways." With these words, Elizabeth Barrett Browning has come down to us as a romantic heroine, a recluse controlled by a domineering father and often overshadowed by her husband, Robert Browning. But behind the melodrama lies a thoroughly modern figure whose extraordinary life is an electrifying study in self-invention. Born in 1806, Barrett Browning lived in an age when women could not attend a university, own property after marriage, or vote. And yet she seized control of her private income, defied chronic illness and disability, became an advocate for the revolutionary Italy to which she eloped, and changed the course of cultural history. Her late-in-life verse novel masterpiece, *Aurora Leigh*, reveals both the brilliance and originality of her mind, as well as the challenges of being a woman writer in the Victorian era. A feminist icon, high-profile activist for the abolition of slavery, and international literary superstar, Barrett Browning inspired writers as diverse as Emily Dickinson, George Eliot, Rudyard Kipling, Oscar Wilde, and Virginia Woolf. *Two-Way Mirror* is the first biography of Barrett Browning in more than three decades. With unique access to the poet's abundant correspondence, "astute, thoughtful, and wide-ranging guide" (Times [UK]) Fiona Sampson holds up a mirror to the woman, her art, and the art of biography itself.
