Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and "administrative" charges Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki

Buying a car can be a smart idea - a car loses the lion's share of its value when it is driven off the new car lot, so why let someone else take that loss? But buyer beware: A used car is likely to need more repairs and may come with a short warranty or none at all. In addition, used cars may lack the latest safety features. That is why it is so important for consumers to do extensive research so they can avoid all of the potential pitfalls of buying a used car. The auto experts at "Consumer Reports" have done the work for you and have compiled their extensive research and report their findings into the 2007 edition of USED CAR BUYING GUIDE. This fabulous tool will help steer any consumer who is in the market for a used car towards the better-performing and more reliable used car models and away from those models with a troubled past or substandard performance. Before consumers set foot on a used car lot, they should read all the valuable information provided in this book so they can be armed with as much information as possible and the knowledge to make an educated choice. "Consumer Reports" knows cars and offers the most detailed and revealing used car reliability information available anywhere including: - Unbiased reviews of every major model from 1999 - 2006 - Lists of the best and worst used vehicles and how to avoid a lemon - A checklist of what to look for when inspecting a used car - Best used cars for gas mileage - Tips on negotiating the best price Reliability, recalls and crash test information - Making sense of safety information - How to get the most money when trading in your current car The majority of this book is devoted to the profiles of 264 cars, minivans, SUVs and trucks, presenting all major 1999-2006 models. Each profile contains a photo from the representative year, a write-up of the vehicle, reliability history, crash-test data, and the model years when key safety gear was added and when a major redesign was made.

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-

border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

USA TODAY bestselling author Colleen Coble's Lavender Tides novels, with her custom blend of suspense and romance, are now available in one e-collection. "Prepare to stay up all night . . . Coble's beautiful, emotional prose coupled with her keen sense of pacing, escalating danger, and very real characters place her firmly at the top of the suspense genre. I could not put [The View from Rainshadow Bay] down." —Allison Brennan, New York Times bestselling author The View from Rainshadow Bay After her husband, Jack, dies in a climbing incident, Shauna has only her five-year-old son and her helicopter charter business to live for. Every day is a struggle to make ends meet and she lives in constant fear of losing even more than she already has. When her business partner is murdered, his final words convince Shauna that she's in danger too. But where can she turn? Zach Bannister was her husband's best friend and is the person she blames for his death. She's barely spoken to him since. But right now he seems her only hope for protecting her son. Zach is only too happy to help Shauna any way he can. But there are secrets dating back to Shauna's childhood that more than one person prefer to keep hidden. Leaving Lavender Tides Having narrowly avoided tragedy in their hometown of Lavender Tides, Washington, Shauna and Zach Bannister are finally on a honeymoon cruise through the Hawaiian islands. Lost in the glow of their newfound love, they eagerly anticipate basking in the warmth of the lush tropics. But soon the newlyweds begin receiving mysterious threats. After Zach survives two attempts on his life—staged as freak accidents—Shauna ominously receives flowers from a stranger. The lovers become unwitting detectives in an urgent pursuit to discover the identity of their murderous stalker. The House at Saltwater Point Ellie Blackmore is making a name for herself as a house flipper. But when her sister Mackenzie disappears, Ellie can't focus on anything but uncovering what happened. Her only clue is the bloodstain on the deck of Mackenzie's boat. Ellie knows her sister isn't on the best of terms with her ex-husband, Jason, but he wouldn't kill her—would he? Coast Guard intelligence officer Grayson Bradshaw believes Mackenzie faked her own death after stealing a seized cocaine shipment. The problem is convincing Ellie, who seems to view him as the true enemy. Both Ellie and Grayson want truth, but truth—and family—is often more complex than it first appears. Secrets at Cedar Cabin Running for her life in the wake of her mother's murder, Bailey Fleming escapes to the only place she can think of—a remote, dilapidated cabin in Lavender Tides. Intending to finally uncover the truth behind the lies of her past, Bailey only finds more questions when bodies are discovered near her cabin hideout along with traces of a dangerous human trafficking ring. In an unlikely partnership with FBI agent Lance Phoenix, Bailey races to understand the mystery surrounding her life and circumstances before the murderer tracks her down.

This book focuses on the systematic design of architectures, parameters and control of typical hybrid propulsion systems for wheeled and tracked vehicles based on a combination of theoretical research and engineering practice. Adopting a mechatronic system dynamics perspective, principles and methods from the fields of optimal control and system optimization are applied in order to analyze the hybrid propulsion configuration and controller design. Case investigations for typical hybrid propulsion systems of wheeled and tracked ground vehicles are also provided.
