The Lancer name conjures up many different images. For some, it evokes memories of the first-generation cars, introduced in 1973, which fought with the best on the Safari Rally and came out the victors. Others will remember the second-generation models--especially the turbocharged versions, the original Mitsubishi wolf in sheep's clothing--and who could not be aware of the Evolution (Evo) series, launched in 1992? Forged in the fierce heat of WRC competition and honed by years of continuous development, the Lancer Evolution is not only one of the greatest rally cars of all time, it is also a desirable high-performance road car, too. Written in Japan with the full cooperation of Mitsubishi and key staff members, this is the definitive

international story of all the world's Lancers, whether they carried Mitsubishi, Dodge, Colt, Plymouth, Valiant, Eagle, Proton, or Hyundai badges, with special emphasis on the Evolution models.

Popular Science

This is a book for tall people, those who relate to them, and anyone interested in height in general. Being tall coincides with considerable professional, athletic, and social benefits. Yet there are also some problems, and these raise some questions. For instance, if longer levers and more cells really are behind increased risk of injuries and cancer, then how is it that giraffes get by? And why is it that society reveres tall stature but then compromises our safety with cramped cars and other things? And, as tall women might be pondering, where have all the tall, dark, and handsome men gone? Lastly, what can be done about all this?

These questions and more will all be answered by a tall protagonist over eight chapters: Evolution, Scaling, Spine, Manufactured, Ergonomics, Growth, Longevity, and Society.
