What does it take to be one of the world's best high-altitude mountain climbers? A lot of fundraising; traveling in some of the

world's most dangerous countries; enduring cold bivouacs, searing lungs, and a cloudy mind when you can least afford one. It means learning the hard lessons the mountains teach. Steve House built his reputation on ascents throughout the Alps, Canada, Alaska, the Karakoram and the Himalaya that have expanded possibilities of style, speed, and difficulty. In 2005 Steve and alpinist Vince Anderson pioneered a direct new route on the Rupal Face of 26,600-foot Nanga Parbat, which had never before been climbed in alpine style. 1001 Climbing Tips The Mountaineers Books Part history, part biography, part climbing guide, *Schurman Rock: A History & Guide* describes the design and construction of Schurman Rock, the world's first artificial climbing wall, built in 1938-39 at Camp Long in Seattle, Washington. The book includes a history of the creation of Camp Long by by William G. Long, a Superior

Court judge, who seized the opportunity to turn an unused 68-acre tract of swampy forest land into a wilderness camp for youth, and a biography of Clark Schurman, a Scoutmaster and Chief Climbing Guide at Mount Rainier, who envisioned and then built his "dream rock" to provide a place to teach mountaineering skills to youth. Thousands of kids and adults, including Fred Beckey and Jim and Lou Whittaker, learned to climb on Schurman Rock over the past 80 years. In 1938, Schurman published an article describing 22 routes on the rock--"short bits" as he called them. This book expands on this with a guide to several boulder problems on the rock. Includes many historic photos and a foreword by Pacific Northwest climbing legend Jim Whittaker.
