Fifty years have passed since the first Earth Day, on 22 April 1970. This accessible, incisive and timely collection of essays brings together a diverse set of expert voices to examine how the Earth's environment has changed over this past half century, and what lies in store for our planet over the coming fifty years. Earth 2020: An Insider's Guide to a Rapidly Changing Planet responds to a public increasingly concerned about the deterioration of Earth's natural systems, offering readers a wealth of perspectives on our shared ecological past, and on the future trajectory of planet Earth. Written by world-leading thinkers on the front-lines of global change research and policy, this multi-disciplinary collection maintains a dual focus: some essays investigate specific facets of the physical Earth system, while others explore the social, legal and political dimensions shaping the human environmental footprint. In doing so, the essays collectively highlight the urgent need for collaboration across diverse domains of expertise in addressing one of the most significant challenges facing us today. Earth 2020 is essential reading for everyone seeking a deeper understanding of the past, present and future of our planet, and the role of humanity in shaping this trajectory.

A renowned explorer and acclaimed author shows us that walking is a natural accompaniment to creativity—and among the most radical things we can do. “ Simple, profound ... compelling ... [a book that] packs a surprisingly motivational punch ” (GQ). Why do we walk? Where do we walk from? What is our destination? Placing one foot in front of the other and embarking on the journey of discovery are activities intrinsic to our nature. But as universal as walking is, each of us will experience it differently. For renowned explorer Erling Kagge, walking is a natural accompaniment to creativity: the occasion for the unspoken dialogue of thinking. Walking is also the antidote to the speed at which we conduct our lives, to our insistence on rushing, on doing everything in a precipitous manner.

You are a writer and you have a killer book idea. When your project starts to take off you will find yourself managing a writhing tangle of ideas, possibilities and potential potholes. How do you turn your inspiration into a finished novel? Writing a User's Manual offers practical insight into the processes that go into writing a novel, from planning to story development, research to revision and, finally, delivery in a form which will catch the eye of an agent or publisher. David Hewson, a highly productive and successful writer of popular fiction with more than sixteen novels in print in twenty or so languages, shows how to manage the day to day process of writing. Writers will learn how to get the best out of software and novel writing packages such as Scrivener, which help you view your novel not as one piece of text, but as individual linked scenes, each with their own statistics, notes and place within the novel structure. As you write, you will need to assemble the main building blocks to underpin your artistry : story

structure; genre - and how that affects what you write; point of view; past, present or future tense; software for keeping a book journal to manage your ideas, research and outlining; organization and more. The advice contained in this book could mean the difference between finishing your novel, and a never-ending work in progress. An essential tool for writers of all kinds. Foreword by Lee Child.

An award-winning scientist offers his unorthodox approach to childrearing: “ Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions ” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you ' re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley ' s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You ' ll be laughing and learning at the same time.

[Life, a User's Manual](#) Penguin

How should I live? What is my purpose? Can I find happiness? Ever felt as though life would be simpler if it came with an instruction manual? There are no easy answers to the big questions. And life does not follow a straight path from A to B. Since the beginning of time, people have asked questions about how they should live and, from Ancient Greece to Japan, philosophers have attempted to solve these questions for us. The timeless wisdom that they offer can help us to find our own path. In this insightful, engaging book, renowned existential psychotherapist and philosophical counsellor Antonia Macaro and bestselling philosopher Julian Baggini cover topics such as bereavement, luck, free will and relationships, and guide us through what the greatest thinkers to ever walk the earth have to say on these subjects, from the Stoics to Sartre. Discover advice from the world's greatest thinkers on questions like: Is there a right way to grieve? What is free will? How can we learn from past mistakes? Do we make our own luck?

What do you do when your marriage is so unhappy that you begin to fantasize about your husband's funeral? That's how bad it got for Alisa Bowman. . . So she launched a last-ditch effort to save her marriage. *Project: Happily Ever After* is her fearlessly honest and humorous account of how she went from being a “ divorce daydreamer ” to renewing her wedding vows—and all of the steps in between. From bikini waxes to erotica, romance instruction manuals to second honeymoons, the silent treatment to power struggles, she goes where many marriage-improvement gurus have feared to tread. Equal parts funny, poignant, and most importantly, useful, Bowman's story will give other miserably-married folks courage and hope. And in addition to telling her own story, she packs straightforward prescriptive guidance, including a “ 10-Step Marital Improvement Guide. ” Readers will laugh. They'll cry. And they can start on the road toward their own happy ending!
