Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on

---

porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.

This book acts as a compilation of papers presented in the Human Engineering Symposium (HUMENS 2021). The symposium theme, "Human-centered Technology for A Better Tomorrow," covers the following research topics: ergonomics, biomechanics, sports technology, medical device and instrumentation, artificial intelligence / machine learning, industrial design, rehabilitation, additive manufacturing, modelling and bio-simulation, and signal processing. Fifty-nine articles published in this book are divided into four parts, namely Part 1–Artificial Intelligence

---

and Biosimulation, Part 2—Biomechanics, Safety and Sports, Part 3—Design and Instrumentation, and Part 4—Ergonomics.

At over 900,000 cars produced - and counting - the Mazda MX-5 holds the Guinness World Record as the best-selling two-seater sports car ever produced. And while mere numbers should not be the only barometer of success, it has taken a car of the MX-5's talent to capture the imagination of both enthusiasts and the

general motoring public alike. Mazda MX-5 - The Complete Story examines the design, development and production of this innovative sports car. Topics covered include: Details of the engine and drivetrain technology that gave the MX-5 its sharp handling and performance; Chronicles the stories of the engineers and designers behind the MX-5's success; Looks at the closest contemporary rivals to the car, and why the MX-5 was far and away the most successful; Covers all special editions and the racing story; Includes a detailed buyer's guide for each generation, specification tables and owner's experiences. A concise, detailed guide to this groundbreaking and innovative sports car. Superbly illustrated with 200 colour photographs. Antony Ingram is a freelance motoring writer and is passionate about classic cars and modern performance vehicles.

Packard, and Texas Instruments, policy deployment has created a critical bridge between corporate goals and their company-wide deployment. Hoshin Kanri offers top and middle managers a guide to customizing a policy deployment program especially suited to their company. This book is a compilation of examples of policy deployment and demonstrates how company vision is converted into individual responsibility. It contains practical guidelines, 150 charts and diagrams, and five case studies that illustrate the procedures of Hoshin Kanri. The six steps to advanced process planning are reviewed and include: a five-year vision; one-year plan; deployment to departments; execution; monthly audit; and annual audit. The practice of Hoshin Kanri will enable you to: Align all departmental and individual project goals to corporate goals and eliminate duplication of effort. Communicate to every employee his or her role in achieving the company vision. Closely monitor performance using carefully devised measures of progress. Learn how Hoshin Kanri can increase your company's responsiveness to social, economic, and technical changes through flexible strategic management. In Porsche 911: 50 Years, bestselling author Randy Leffingwell celebrates a half-century of one of the world's premiere sports cars, focusing on the major themes that have defined Porsche's rear-engined wonder. Randy tells the whole story--design and development, racing and competition, engineering and technology, style and culture. All the iconic 911 models are included: the original 901 prototype that set the standard; the legendary RS models that made the little Porsche a dominant force on the world's racetracks; the infamous Turbo, the car that kept the performance flame alight during the dark, dismal decade of the

---

1970s; the fabled 959, the model that redefined the term "sports car"; the 993, last of the original air-cooled models; and the 996, 997, and 991, the liquid-cooled cars that brought the 911 into a new millennium. Beyond telling the story of the cars, Porsche 911: 50 years also spotlights the people behind them: Ferdinand "Butzi" Porsche, the son of legendary Porsche founder Ferdinand "Ferry" Porsche, who co-designed the instantly recognizable 911 shape; Peter W. Schutz, the Porsche CEO who saved the 911 from extinction; and Dr. Helmuth Bott, the engineering genius behind many of the groundbreaking technologies that have defined the 911, including fuel injection, turbocharging,

and all-wheel-drive. Leffingwell also tells the story of the 911 community--the clubs and culture that surround the car. Together, all of these facets make Porsche 911: 50 Years the most essential book in any Porsche owner or fan's library.

### **Nissan Almera & Tino Service and Repair Manual - 00-07** Haynes Publishing

A fierce, honest, elegant and often hilarious debunking of the great fallacies that drive modern medicine. By the award-winning author of *The Way We Die Now*.

---

Seamus O'Mahony writes about the illusion of progress, the notion that more and more diseases can be 'conquered' ad infinitum. He punctures the idiocy of consumerism, the idea that healthcare can be endlessly adapted to the wishes of individuals. He excoriates the claims of Big Science, the spending of vast sums on research follies like the Human Genome Project. And he highlights one of the most dangerous errors of industrialized medicine: an over-reliance on metrics, and a neglect of things that can't easily be measured, like compassion. 'A deeply fascinating and rousing book' Mail on Sunday. 'What makes this book a delightful, if unsettling read, is not just O'Mahony's scholarly and witty prose, but also his brutal honesty' The Times.

“Strategic International Management” takes a global perspective and covers the major aspects of international business strategies, the coordination of international companies and the particularities of international value chain activities and

---

management functions. The book provides a thorough understanding of how Production & Sourcing, Research & Development, Marketing, Human Resource Management and Controlling have to be designed in an international company and what models are available to understand those activities in an international context. The book offers 20 lessons that provide a comprehensive overview of all key issues. Each lesson is accompanied by a case study from an international company to facilitate the understanding of all important factors involved in strategic international management.

Branding is currently one of the most

exciting subjects around; business people everywhere are waking up to the fact that brands are a huge source of value. But it is only by understanding the real value that brands bring to consumers that brand owners and manufacturers can truly learn to exploit that value. Brands no longer operate only in the traditional packaged goods markets; the techniques of good branding are just as vital in the business-to-business and utilities sectors, and are increasingly being applied even in non-commercial areas, from charities to football clubs. This comprehensive and authoritative book looks at branding from a wide range of perspectives: from the creation of a new brand, through the development of brand names and packaging designs, to advertising

---

international brands. It explores the hot topics of brand valuation and brand licensing, as well as studying the increasingly important role of the corporate brand. This book is a must for anyone with an interest in brands.

Springer Nature

First released in 2005, Patrick Dyer's popular title has been revised, extended and reformatted for this new edition. Between 1965 and 1977 the Swedish manufacturer Volvo produced a staggering 40,000 F88 trucks. Along with Scania, Volvo came to dominate the European truck market. Before this revolution trucks were often noisy,

uncomfortable and liable to break down. Volvo transformed engines, gearboxes, frames, brakes, drives and shafts, bringing all these components under their own control. This unique position gave them an enviable edge over rivals for quality control and supply. Development work, too, could proceed without interruption. Wherever trucking work was needed on substantial loads or for long-haul work the F88 was bound to be a serious contender. Patrick Dyer presents the predecessors to the F88, a photographic record of the truck at work in all manner of situations and then deals with the successor F89. His second edition includes all the original photographs as well as 53 new ones -

---

including some rarities - mainly from the Volvo archives. He has added 7,000 words to the text. Patrick Dyer works in motor sport and also holds a Class 1 HGV licence. In companion books for Old Pond he has covered other iconic machines from Scania, DAF and Ford. *How to Super Tune and Modify Holley Carburetors* Haynes Manuals N. America, Incorporated
