'This is a book about rural Australia, love gained and lost, and fighting for what you believe in. But, unlike many books in the same genre, *The Saddler Boys* is subtly about so much more.' Weekly Times Schoolteacher Natalie has always been a city girl. She has a handsome boyfriend and a family who give her only the best. But she craves her own space, and her own classroom, before settling down into the life she is expected to lead. When Nat takes up a posting at a tiny school in remote Western Australia, it proves quite the culture shock, but she is soon welcomed by the inquisitive locals, particularly young student Billy and his intriguing single father, Drew. As Nat's school comes under threat of closure, and Billy's estranged mother turns up out of the blue, Nat finds herself fighting for the township and battling with her heart. Torn between her society life in Perth and the rural community that needs her, Nat must risk losing it all to find out what she's really made of - and where she truly belongs. Praise for Fiona Palmer 'Fiona Palmer just keeps getting better.' Rachael Johns 'Palmer's passion for the land bleeds into the story, and her scenes are vivid and genuine, just as her characters are.' Book'd Out 'Fiona Palmer has well and truly earned her place as a leading writer of one of Australia's much-loved genres.' Countryman

Garden and Grove is a pioneering study of the English fascination with Italian Renaissance gardens. John Dixon Hunt studies reactions of English visitors in their journals and travel books to the exciting world of Italian gardens: its links with classical villas, with Virgil and farming, with

Ovid and metamorphosis, its association with theater, its variety, its staged debates between art and nature. Then he looks at what English visitors made of these Italian garden experiences upon their return home and at how they created Italianate gardens on their estates, on their stages, and in their poems. With a wealth of literary and visual materials previously untapped, Hunt provides a new history of an intriguing and vital phase of English garden history. Not only does he suggest the centrality of the garden as a focus for many social, aesthetic, political, and philosophical ideas but he argues that the so-called English landscape garden before "Capability" Brown, in the late eighteenth century, owed much to a long and continuing emulation of Italian Renaissance models. Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer ' s personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as: • physical principles of various material handling systems; • considerations in selecting technically efficient and environmentally friendly equipment; • best practices in upgrading and optimizing existing bulk material handling facilities; • strategies to select proper equipment in the early phases of a new project. Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.
