A legend in the car industry reveals the philosophy that's starting to turn General Motors around. In 2001, General Motors hired Bob Lutz out of retirement with a mandate to save the company by making great cars again. He launched a war against penny pinching, office politics, turf wars, and risk avoidance. After declaring bankruptcy during the recession of 2008, GM is back on track thanks to its embrace of Lutz's philosophy. When Lutz got into the auto business in the early sixties, CEOs knew that if you captured the public's imagination with great cars, the money would follow. The car guys held sway, and GM dominated with bold, creative leadership and iconic brands like Cadillac, Buick, Pontiac, Oldsmobile, GMC, and Chevrolet. But then GM's leadership began to put their faith in analysis, determined to eliminate the "waste" and "personality worship" of the bygone creative leaders. Management got too smart for its own good. With the bean counters firmly in charge, carmakers (and much of American industry) lost their single-minded focus on product excellence. Decline followed. Lutz's commonsense lessons (with a generous helping of fascinating anecdotes) will inspire readers at any company facing the bean counter analysis-paralysis menace.

First published in 1987. War in the 18th century was a bloody business. A line of infantry would slowly march, to the beat of a drum, into a hail of enemy fire. Whole ranks would be wiped out by cannon fire and musketry. Christopher Duffy's investigates the brutalities of the battlefield and also traces the lives of the officer to the soldier from the formative conditions of their earliest years to their violent deaths or retirement, and shows that, below their well-ordered exteriors, the armies of the Age of Reason underwent a revolutionary change from medieval to modern structures and ways of thinking.

This is the car that launched the muscle car era and gave the Baby Boomers high-speed wings. Trivia freaks might know that Pontiac's "GTO" means "Gran Turismo Omologato," but muscle car fans know it earned its nickname "The Great One" at a time when America built the greatest cars on earth. It wasn't the fastest, the most powerful, or the most outrageous muscle car, but Pontiac's GTO resides at the very top of the pantheon because it was the first. Pontiac GTO 50 Years: The Original Muscle Car follows the rise of this iconic vehicle from the day in 1963 when Chief Engineer John Z. DeLorean bolted a 389-cubic-inch GTO engine into a prototype Tempest coupe through the final GTO rendition in 2006. Wedding that massive V-8 to a mid-size GM chassis created one of the fastest production cars of the time but also made it a car just about anyone with a job could afford. It started as an option package that was supposed to be limited to 5,000 units. Instead, word of mouth pushed sales to more than six times that many in its first year. Hundreds of photographs round out this thoroughly researched history and offer insight into the vehicle that, through redesigns, repackages, and relaunches, came of age with the Baby Boomer generation. From classic 1960s models to the GTO's revival in 2004, the exhilarating story of the outlaw that should never have been "The Great One" and will never be again "The Great One" will thrill any auto enthusiast.
