This superb book tells the story of one of the most historically interesting of all Jaguar D-types, the XKD 504. This is a car that has raced more than any other D-type across its long and varied life, and this life is recounted in full. From its role as a works car used extensively for testing fuel injection, to two seasons of racing throughout Europe with Ecurie Ecosse, to four busy years of national competition in the hands of first Mike Salmon and then Peter Sutcliffe, it's all here. This book provides fascinating insight into every aspect of this D-type's history, supported by a fine collection of period photographs.

In a warm, perceptive essay that touches on economics, fashion, literature, and politics, the Strega Prize – winning author of *Story of My People* reflects on the seismic shifts of 2020 and the diverse ways we're adapting. Attempting to make sense of the incredible upheaval of 2020—from the devastating impact of COVID-19 to the sudden loss of his father—Edoardo Nesi considers the changing global economy and its effect on our lives. He shares the stories of Alberto Magelli, a small textile entrepreneur; Livia Firth, a prominent advocate for sustainability; Elisa Martelli, a young Sangiovese winemaker; Enrico Giovannini, a leading economist and statistician; Rino Pratesi, a proud butcher from the heart of Tuscany; and more. From the overworked to the unemployed, we're all grappling with difficult questions about our current disorienting world. Will we ever feel healthy again, and what will it take to regain "normality?" What does progress mean today? Have science and technology let us down? What will the increased prevalence of remote working mean for our cities, and for our lifestyles generally? Deftly weaving together the personal and the economic, Nesi takes us on a fascinating journey to understanding.

[Mini Cooper \(R55, R56, R57\) Service Manual: 2007, 2008, 2009, 2010, 2011, 2012, 2013: Cooper, Cooper S, John Cooper Works \(Jcw\) Including Clubman, Con Gardner Press](#)

Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process.
