Everything Turns Into Something Else: Poems New World Library

The real need for our world is not that we do EVERYONE'S part; just that we do OUR part. And with all of us working together, we will transform the world. Shane Stanford says: "On my office wall is a picture of a small child who lives in a remote village in sub-Saharan Africa. She is an orphan, having lost most of her family to the HIV/AIDS crisis. Each day, the little girl eats only half of her meager lunch. She takes the other half and puts it into her travel sack, so that she can take the leftovers to her dying aunt. The world might look at this child and assess that her little life has little to offer. But don't tell the child's aunt. Without this child's sacrifice and maturity, her aunt would have no food and would die. In spite of this child not being able to do much for her dying aunt, she does something, every day. The real need for our world is not that we do every part; it's that we just do our part. And working together to do that something God calls us to do--all of us working together--we will transform this world." Read an interview with Shane

Analyze Anything Simon and Schuster

In this smart, playful, and provocative book, one of today's most original business thinkers argues that we underestimate the importance of romance in our lives and that we can find it in and through business—by designing products, services, and experiences that connect us with something greater than ourselves. Against the backdrop of eroding trust in capitalism, pervasive technology, big data, and the desire to quantify all of our behaviors, The Business Romantic makes a compelling case that we must meld the pursuit of success and achievement with romance if we want to create an economy that serves our entire selves. A rising star in data analytics who is in love with the intrinsic beauty of spreadsheets; the mastermind behind a brand built on absence; an Argentinian couple who revolutionize shoelaces; the founder of a foodie-oriented start-up that creates intimate conversation spaces; a performance artist who offers fake corporate seminars for real professionals—these are some of the innovators readers will meet in this witty, deeply personal, and rousing ramble through the world of Business Romanticism. The Business Romantic not only provides surprising insights into the emotional and social aspects of business but also presents "Rules of Enchantment" that will help both individuals and organizations construct more meaningful experiences for themselves and others. The Business Romantic offers a radically different view of the good life and outlines how to better meet one's own desires as well as those of customers, employees, and society. It encourages readers to expect more from companies, to give more of themselves, and to fall back in love with their work and their lives.

Awesome that “reveals how all of us can live happier lives” (Gretchen Rubin). What is the formula for a happy life? Neil Pasricha is a Harvard MBA, a New York Times–bestselling author, a Walmart executive, a father, a husband. After selling more than a million copies of the Book of Awesome series, wherein he observed the everyday things he thought were awesome, he now shifts his focus to the practicalities of living an awesome life. In his new book *The Happiness Equation*, Pasricha illustrates how to want nothing and do anything in order to have everything. If that sounds like a contradiction in terms, you simply have yet to unlock the 9 Secrets to Happiness. Each secret takes a piece out of the core of common sense, turns it on its head to present it in a completely new light, and then provides practical and specific guidelines for how to apply this new outlook to lead a fulfilling life. Once you’ve unlocked Pasricha’s 9 Secrets, you will understand counter intuitive concepts such as: Success Does Not Lead to Happiness, Never Take Advice, and Retirement Is a Broken Theory. You will learn and then master three brand-new fundamental life tests: the Saturday Morning Test, The Bench Test, and the Five People Test. You will know the difference between external goals and internal goals and how to make more money than a Harvard MBA (hint: it has nothing to do with your annual salary). You will discover that true wealth has nothing to do with money, multitasking is a myth, and the elimination of options leads to more choice. *The Happiness Equation* is a book that will change how you think about pretty much everything—your time, your career, your relationships, your family, and, ultimately, of course, your happiness.

Bestselling author and acclaimed physicist Lawrence Krauss offers a paradigm-shifting view of how everything that exists came to be in the first place. “Where did the universe come from? What was there before it? What will the future bring? And finally, why is there something rather than nothing?” One of the few prominent scientists today to have crossed the chasm between science and popular culture, Krauss describes the staggeringly beautiful experimental observations and mind-bending new theories that demonstrate not only can something arise from nothing, something will always arise from nothing. With a new preface about the significance of the discovery of the Higgs particle, *A Universe from Nothing* uses Krauss’s characteristic wry humor and wonderfully clear explanations to take us back to the beginning of the beginning, presenting the most recent evidence for how our universe evolved—and the implications for how it’s going to end. Provocative, challenging, and delightfully readable, this is a game-changing look at the most basic underpinning of existence and a powerful antidote to outmoded philosophical, religious, and scientific thinking.
