An award-winning scientist offers his unorthodox approach to childrearing: “ Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions ” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you ’ re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley ’ s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You ’ ll be laughing and learning at the same time. *Subaru Legacy & Forester 2000 Through 2006* Haynes Publications

What conceptual blind spot kept the ancient Greeks (unlike the Indians and Maya) from developing a concept of zero? Why did St. Augustine equate nothingness with the Devil? What tortuous means did 17th-century scientists employ in their attempts to create a vacuum? And why do contemporary quantum physicists believe that the void is actually seething with subatomic activity? You'll find the answers in this dizzily erudite and elegantly explained book by the English cosmologist John D. Barrow. Ranging through mathematics, theology, philosophy, literature, particle physics, and cosmology, *The Book of Nothing* explores the enduring hold that vacuity has exercised on the human imagination. Combining high-wire speculation with a wealth of reference that takes in Freddy Mercury and Shakespeare alongside Isaac Newton, Albert Einstein, and Stephen Hawking, the result is a fascinating excursion to the vanishing point of our knowledge.

Stop Discounting! Start Selling! For more than seven decades, David Oreck has been successfully marketing products to the American consumer. He took his little startup vacuum company and turned it into a household name and not by relying on big advertising or slick sales pitches. He understood that the customer does not want to be 'sold'; they want value! Just like many small business people today, Oreck started his company on a shoestring and a dream but to compete with the national brands and big corporations, he had to get creative. This meant taking his product directly to consumers and bypassing the middlemen. Success was not easy and there were many challenges that could have suffocated his small company - but his persistence and marketing prowess kept the company going - and growing. It is easy to think that times have changed, but the truth is the consumer hasn't and once you really understand your customer you have the key that will solidify your place in the market. This is good news for all the little companies that may be wondering how they could ever compete with the bog box retailers of the world. Through unconventional wisdom that flies in the face of conventional marketing notions, Oreck explains how today's entrepreneur can create their own profitable niche in a very crowded market - no matter the economy. This specific time-tested knowledge can be the key to your business becoming profitable or falling by the wayside this year and offers more than 70 years of priceless real world marketing experience. Don't miss your chance to learn from one of the masters of business!

In a powerful debut novel that moves between the crowded streets of London and the desolate mountains of Iran, Yasmin Crowther paints a stirring portrait of a family shaken by events from decades ago and worlds away. On a rainy day in London the dark secrets and troubled past of Maryam Mazar surface violently, with tragic consequences for her daughter, Sara, and her newly orphaned nephew. Maryam leaves her English husband and family and returns to the remote Iranian village where her story began. In a quest to piece their life back together, Sara follows her mother and finally learns the terrible price Maryam once had to pay for her freedom, and of the love she left behind. Set against the breathtaking beauty of two very different places, this stunning family drama transcends culture and is, at its core, a rich and haunting narrative about mothers and daughters.
