Ed "Big Daddy" Roth (1932-2001) was a phenomenon. His body of work is still discussed in hot rodding, fine arts and pop culture circles and his cult following remains as devoted as it was during his career. His 1963 Mysterion show car--featuring two big-block Ford V8s--was his masterpiece and the story of its rise and brief existence is legendary. Though it was immortalized as a popular plastic model kit and is featured on several websites, little is known about Roth's magnum opus. There are a number of fanciful stories of its demise--mostly fiction. Combining history and shop class, this book provides a full investigation of Mysterion--both the legend and the machine itself. Drawing on interviews, magazine articles, photos, models and other (sometimes obscure) sources, the author pieces

together the true story of the car, while documenting his own faithful bolt-by-bolt recreation of Mysterion.

The Toyota Way Fieldbook MIT Press

This revised edition of Taylor's classic work on the internal-combustion engine incorporates changes and additions in engine design and control that have been brought on by the world petroleum crisis, the subsequent emphasis on fuel economy, and the legal restraints on air pollution. The fundamentals and the topical organization, however, remain the same. The analytic rather than merely descriptive treatment of actual engine cycles,

the exhaustive studies of air capacity, heat flow, friction, and the effects of cylinder size, and the emphasis on application have been preserved. These are the basic qualities that have made Taylor's work indispensable to more than one generation of engineers and designers of internal-combustion engines, as well as to teachers and graduate students in the fields of power, internal-combustion engineering, and general machine design.

Though he has made only five films in two decades—Strictly Ballroom, William Shakespeare's Romeo + Juliet, and the Oscar-nominated films Moulin Rouge!, Australia, and The Great Gatsby—Australian writer-director Baz Luhrmann is an internationally known brand name. His name has even entered the English language as a verb, as in “ to Baz things up, ” meaning “ to decorate them with an exuberant flourish. ”

Celebrated by some, loathed by others, his work is underscored by what has been described as “ an aesthetic of artifice ” and is notable for both its glittering surfaces and recurring concerns. In this collection of interviews, Luhrmann discusses his methods and his motives, explaining what has been

important to him and his collaborators from the start and how he has been able to maintain an independence from the studios that have backed his films. He also speaks about his other artistic endeavors, including stage productions of *La Bohème* and *A Midsummer Night's Dream*, and his wife and collaborative partner Catherine Martin, who has received two Academy Awards for her work with Luhrmann.
