Buying a car can be a smart idea - a car loses the lion's share of its value when it is driven off the new car lot, so why let someone else take that loss? But buyer beware: A used car is likely to need more repairs and may come with a short warranty or none at all. In addition, used cars may lack the latest safety features. That is why it is so important for consumers to do extensive research so they can avoid all of the potential pitfalls of buying a used car. The auto experts at "Consumer Reports" have done the work for you and have compiled their extensive research and report their findings into the 2007 edition of USED CAR BUYING GUIDE. In research on Information Structure, there is an ongoing discussion about the role of contrast. While most linguists consider contrast to be compatible with both focus and topic, some argue that it is an autonomous IS category. Contrast has been shown to be encoded by different linguistic means, such as specific morphemes, adverbials, clefts, prosodic cues. Hence, this concept is also related to other domains, in particular morphosyntax and prosody. The precise way in which they interact is however not yet entirely clear. Moreover, from a methodological point of view, the identification and annotation of contrast in corpora is not straightforward. This

volume provides a selection of articles discussing the definition of contrast, the importance of distinguishing different types of contrast, the use of several encoding strategies, and the annotation of contrast in corpora using the Question Under Discussion Model. The contributions offer data on English, French, French Belgian Sign Language, German, Hindi, Italian and Spanish.

Bis nachhaltige technische und wirtschaftliche Lösungen für den Elektroantrieb gefunden sind, behält der Verbrennungsmotor seine dominierende Stellung als Antriebsquelle für Pkw und Nutzfahrzeuge. In den nächsten Jahrzehnten kommt dem klassischen Motor damit weiterhin die Rolle des Schrittmachers für CO2-arme Mobilität zu. Um die ambitionierten Umweltziele zu erreichen, müssen alle Komponenten, Systeme und Funktionen des Motors weiter optimiert und an die immer komplexeren Anforderungen im Gesamtsystem angepasst werden. Vor dem Hintergrund dieser Entwicklungsaufgaben veranstaltet ATZlive und das VDI Wissensforum erstmals gemeinsam den Internationalen Motorenkongress.
