From the military vehicles of the 1930s through the post-WWII cars, up to and including the final German-built model of 1979, this book offers a loving tribute to the car in sumptuous detail. The beautifully restored and kept cars of each decade are displayed across several double page spreads. Parts of each model are shown in close-up, compared and explained using studio photographs of each model's steering wheels, indicators, engine bays and other aspects of design and function. The history of the Beetle is illustrated using contemporary archive photography, and attention is given to the cultural impact of the Beetle as shown through movies (such as the Herbie franchise), advertising and graphic design. This large format, fully illustrated book presents the Beetle as an object of art, albeit one that starts every time and will run forever on reused cooking oil, with a little modification. It's about time a thorough, hands-on restoration book has been authored by authorities who know the Beetle like the back of their hands. Volkswagon owners get dewey-eyed with nostalgia just thinking about their old Beetles. This was a vehicle of a thousand stories, and My Bug presents some of the best of them in all their tie-dyed glory. More than forty brand-new stories, poems, anecdotes, and general love letters plus 100 treasured photographs, illustrations, and cartoons from smitten owners recall the highs and lows of the golden days of Beetlemania: water splashing through holes in the rusted floor; trying to make out in the backseat (indeed, trying to make it out of the backseat; the mystery test button on the dash, the secret panel behind the footrest, the battery so conveniently(!) located under the backseat), the scalding blast of sudden heat as the car chugged up an incline. No self-respecting Boomer can forget the Beetle, even if he or she is driving a Beemer today. Now is the time to get out the bellbottoms and put those memory cells in gear. The Bug is back.
