With his particular questioning style, Jacques Arnould takes us on a journey through the history of space exploration and utilisation from a multidisciplinary perspective. This book deals with philosophical and societal questions, national and international policy, legal and responsibility aspects. By asking the right questions, Jacques helps us understand many of the questions most humans ask themselves about why, what, for whom, for how long and how humanity will (or should) expand its presence in and benefit from outer space. The French CNES is the first space agency that decided to employ an expert in the ethics of space activities, and the International Space University and the University of South Australia are the only where space ethics is regularly taught in its programs as part of its unique

Scholars have been studying the films of Stanley Kubrick for decades. This book, however, breaks new ground by bringing together recent empirical approaches to Kubrick with earlier, formalist approaches to arrive at a broader understanding of the ways in which Kubrick ' s methods were developed to create the unique aesthetic creation that is 2001: A Space Odyssey. As the fiftieth anniversary of the film nears, the contributors explore its still striking design, vision, and philosophical structure, offering new insights and analyses that

The spellbinding classic that started it all, from the #1 New York Times bestselling author “A magnificent, compulsively readable thriller . . . Rice begins where Bram Stoker and the Hollywood versions leave off and penetrates directly to the true fascination of the myth—the education of the vampire.”—Chicago Tribune Here are the confessions of a vampire. Hypnotic, shocking, and chillingly sensual, this is a novel of mesmerizing beauty and astonishing force—a story of danger and flight, of love and loss, of suspense and resolution, and of the extraordinary power of the senses. It is a novel only Anne Rice could write.

The Making of 2001: A Space Odyssey Lulu.com

Already renowned for his science fiction and scientific nonfiction, Arthur C. Clarke became the world's most famous science fiction writer after the success of *2001: A Space Odyssey*. He then produced novels like *Rendezvous with Rama* and *The Fountains of Paradise* that many regard as his finest works. Gary Westfahl closely examines Clarke's remarkable career, ranging from his forgotten juvenilia to the passages he completed for a final novel, *The Last Theorem*. As Westfahl explains, Clarke's science fiction offered original perspectives on subjects like new inventions, space travel, humanity's destiny, alien encounters, the undersea world, and religion. While not inclined to mysticism, Clarke necessarily employed mystical language to describe the fantastic achievements of advanced aliens and future humans. Westfahl also contradicts the common perception that Clarke's characters were bland and underdeveloped, arguing that these reticent, solitary individuals, who avoid conventional relationships, represent his most significant prediction of the future, as they embody the increasingly common lifestyle of people in the twenty-first century.

The Righteous Mind Faber & Faber

The definitive story of the making of *2001: A Space Odyssey*, acclaimed today as one of the greatest films ever made, and of director Stanley Kubrick and writer Arthur C. Clarke—"a tremendous explication of a tremendous film...Breathhtaking" (*The Washington Post*). Fifty years ago a strikingly original film had its premiere. Still acclaimed as one of the most remarkable and important motion pictures ever made, *2001: A Space Odyssey* depicted the first contacts between humanity and extraterrestrial intelligence. The movie was the product of a singular collaboration between Stanley Kubrick and science fiction visionary Arthur C. Clarke. Fresh off the success of his cold war satire *Dr. Strangelove*, Kubrick wanted to make the first truly first-

rate science fiction film. Drawing from Clarke's ideas and with one of the author's short stories as the initial inspiration, their bold vision benefited from pioneering special effects that still look extraordinary today, even in an age of computer-generated images. In *Space Odyssey*, author, artist, and award-winning filmmaker Michael Benson "delivers expert inside stuff" (*San Francisco Chronicle*) from his extensive research of Kubrick's and Clarke's archives. He has had the cooperation of Kubrick's widow, Christiane, and interviewed most of the key people still alive who worked on the film. Drawing also from other previously unpublished interviews, *Space Odyssey* provides a 360-degree view of the film from its genesis to its legacy, including many previously untold stories. And it features dozens of photos from the making of the film, most never previously published. "At last! The dense, intense, detailed, and authoritative saga of the making of the greatest motion picture I've ever seen...Michael Benson has done the *Cosmos* a great service" (Academy Award-winning actor Tom Hanks).

"Clarke and Baxter have mastered the art of saving the world in blockbuster style."—*Entertainment Weekly* Returned to the Earth of 2037 by the mysterious and powerful Firstborn, Bisesa Dutt is

haunted by memories of her five years spent on the strange alternate Earth called Mir, a jigsaw-puzzle world made up of lands and people cut out of different eras of Earth's history. Why did the Firstborn create Mir? Why was Bisesa taken there and then brought back just a day after her disappearance? Bisesa's questions are answered when scientists discover an unnatural anomaly in the sun's core—evidence of alien intervention more than two thousand years ago. Now plans set in motion by inscrutable observers light-years away are coming to fruition in a sunstorm designed to eradicate all life on Earth in a bombardment of radiation. As the apocalypse looms, religious and political differences on Earth threaten to undermine every countereffort. And all the while, the Firstborn are watching. . . . The Alien Perspective The Mathematical Association of America From Douglas Adams, the legendary author of one of the most beloved science fiction novels of all time, *The Hitchhiker's Guide to the Galaxy*, comes a wildly inventive novel—in trade paperback for the first time—of ghosts, time travel, and one detective's mission to save humanity from extinction. Quirky and bumbling private investigator Dirk Gently stumbles upon a ghost, millions of years old, wandering the earth and disturbing its people. Dirk soon discovers this phantom yearns for more than a good haunting: it is desperately trying to go back in time to prevent its own death. But this ghost was no ordinary person, and helping it save itself just might change the modern world as we know it. And not in a good way... Endlessly entertaining, Dirk

Gently's Holistic Detective Agency proves that, indeed, “few writers have had such an infectious prose style as Adams” (The Observer). As Dirk Gently tries to solve the mysteries of the universe and the human soul, readers will have their own mystery to solve: Where did the time go?

The mysteries of the monoliths are revealed in this inspired conclusion to the Hugo Award-winning *Space Odyssey* series—“there are marvels aplenty” (The New York Times). On an ill-fated mission to Jupiter in 2001, the mutinous supercomputer HAL sent crewmembers David Bowman and Frank Poole into the frozen void of space. Bowman's strange transformation into a Star Child is traced through the novels 2010 and 2061. But now, a thousand years after his death, Frank Poole is brought back to life—and thrust into a world far more technically advanced than the one he left behind. Poole discovers a world of human minds interfacing directly with computers, genetically engineered dinosaur servants, and massive space elevators built around the equator. He also discovers an impending threat to humanity lurking within the enigmatic monoliths. To fight it, Poole must join forces with Bowman and HAL, now fused into one corporeal consciousness—and the only being with the power to thwart the monoliths' mysterious creators.

“[A] combination of mystery and science fiction almost reaching the level of Isaac Asimov’s classic *LIJE BALEY*—Daneel Olivaw novels.” —CHICAGO SUN TIMES Her code name is Sparta. Her beauty veils a mysterious past and abilities far surpassing those of a normal human. For she is more than human: Sparta is the first product of advanced biotech engineering. But now she is little more than a cipher to herself—crucial memories of the past three years are locked away in the dark recesses of her brain. When the crippled freighter *Star Queen* arrives at Venus Station with a lone survivor on board, Sparta must risk her life to investigate what really happened during its deadly voyage in space. She must solve this mystery even as she unlocks another—the truth behind her own identity . . . This tautly paced story brings together the genius of Arthur C. Clarke and Paul Preuss, whose work has been described by The NEW YORK TIMES as “Lively, intelligent . . . hard-driving.”

2001: A Space Odyssey 3001

Astronomer and science writer David Whitehouse takes us on a journey through the evolving cosmos as he considers humankind’s place in the universe - and how our survival depends on otherworldly perspectives. From the Earth to the depths of outer space, this inspiring book shows how human evolution has been intertwined with the workings of the cosmos from the very beginning, and what the far-distant future may hold, both for the universe and for ourselves. Given enough time, Whitehouse contends, we must communicate with intelligent aliens whose divergent perspective will transform our understanding of the universe. First contact may even come sooner than we think. We have already transmitted signals towards

promising exoplanets. If, say, Gliese 581d harbours life, the return signal could reach us in 2051. Drawing the thread of human consciousness from the cave to the cosmos, the acclaimed author of *Apollo 11: The Inside Story* charts our future journey to the end of space and time and considers whether something of humanity could remain at the end of it all.

2001 A Space Odyssey Simon and Schuster

This blistering novel—from the bestselling, Pulitzer Prize-winning author of *The Road*—returns to the Texas-Mexico border, setting of the famed *Border Trilogy*. The time is our own, when rustlers have given way to drug-runners and small towns have become free-fire zones. One day, a good old boy named Llewellyn Moss finds a pickup truck surrounded by a bodyguard of dead men. A load of heroin and two million dollars in cash are still in the back. When Moss takes the money, he sets off a chain reaction of catastrophic violence that not even the law—in the person of aging, disillusioned Sheriff Bell—can contain. As Moss tries to evade his pursuers—in particular a mysterious mastermind who flips coins for human lives—McCarthy simultaneously strips down the American crime novel and broadens its concerns to encompass themes as ancient as the Bible and as bloodily contemporary as this morning’s headlines. *No Country for Old Men* is a triumph.

A designer’s deep dive into seven science fiction films, filled with “gloriously esoteric nerdery [and] observations as witty as they are keen” (*Wired*). In *Typeset in the Future*, blogger and designer Dave Addey invites sci-fi movie fans on a journey through seven genre-defining classics, discovering how they create compelling visions of the future through typography and design. The book delves deep into *2001: A Space Odyssey*, *Star*

Trek: The Motion Picture, Alien, Blade Runner, Total Recall, WALL·E, and Moon, studying the design tricks and inspirations that make each film transcend mere celluloid and become a believable reality. These studies are illustrated by film stills, concept art, type specimens, and ephemera, plus original interviews with Mike Okuda (Star Trek), Paul Verhoeven (Total Recall), and Ralph Eggleston and Craig Foster (Pixar). Typeset in the Future is an obsessively geeky study of how classic sci-fi movies draw us in to their imagined worlds.
