This book gathers together many of the illuminating essays on science fiction and fantasy film penned by a major critic in the SF field. The pieces are roughly organized in the chronological order of when the movies and television programs being discussed first appeared, with essays providing more general overviews clustered near the beginning and end of the volume, to provide the overall aura of a historical survey. Although this book does not pretend to provide a comprehensive history of science fiction and fantasy films, it does intermingle analyses of films and TV programs with some discussions of related plays, novels, stories, and comic books, particularly in the essays on This Island Earth and 2001: A Space

Odyssey and its sequels. Inciteful, entertaining, and full of intelligent and witty observations about science fiction and its sometimes curious relationship with the visual media, these essays will both delight and entertain critics, fans, and viewers alike.

The definitive story of the making of 2001: A Space Odyssey, acclaimed today as one of the greatest films ever made, and of director Stanley Kubrick and writer Arthur C. Clarke— “ a tremendous explication of a tremendous film....Breathtaking ” (The Washington Post). Fifty years ago a strikingly original film had its premiere. Still acclaimed as one of the most remarkable and important motion pictures ever made, 2001: A Space Odyssey depicted the first contacts between humanity and extraterrestrial intelligence. The movie was the product of

a singular collaboration between Stanley Kubrick and science fiction visionary Arthur C. Clarke. Fresh off the success of his cold war satire Dr. Strangelove, Kubrick wanted to make the first truly first-rate science fiction film. Drawing from Clarke ’ s ideas and with one of the author ’ s short stories as the initial inspiration, their bold vision benefited from pioneering special effects that still look extraordinary today, even in an age of computer-generated images. In Space Odyssey, author, artist, and award-winning filmmaker Michael Benson “ delivers expert inside stuff ” (San Francisco Chronicle) from his extensive research of Kubrick ’ s and Clarke ’ s archives. He has had the cooperation of Kubrick ’ s widow, Christiane, and interviewed most of the key people still alive who worked on the film.

Drawing also from other previously unpublished interviews, *Space Odyssey* provides a 360-degree view of the film from its genesis to its legacy, including many previously untold stories. And it features dozens of photos from the making of the film, most never previously published. “ At last! The dense, intense, detailed, and authoritative saga of the making of the greatest motion picture I ’ ve ever seen... Michael Benson has done the Cosmos a great service ” (Academy Award-winning actor Tom Hanks). [The Lost Worlds of 2001](#)

She 's got a billionaire boyfriend, but life is far from perfect... Thirty-four and divorced, Sierra Wu is a constant disappointment to her family. They approved of her former career as an engineer but were horrified when she quit to run a small greeting card store. So, the last thing she expected in her not-so-spectacular life was being swept off her feet by Colton Sanders. Yes, that Colton Sanders, the billionaire. They 've been together for a year, and despite his reputation with women, it 's going well. There 's only one tiny problem: Jake Tong. A former friend and employee of Colton, the irritatingly handsome Jake tells Sierra to break up with Colton for her own good. She refuses, of course. Why should she trust Jake? But as she continues to bump into Jake in awkward

situations, the attraction between them grows, and she starts wondering if he 's right about Colton...

Updated with the latest archaeological research new chapters on the most influential yet widely unrecognised people of the British isles, In Search of the Dark Ages illuminates the fascinating and mysterious centuries between the Romans and the Norman Conquest of 1066. In this new edition, Michael Wood vividly conjures some of the most important people in British history such as Hadrian, a Libyan refugee from the Arab conquests and arguably the most important person of African origin in British history, to Queen Boadicea, the leader of a terrible war of

resistance against the Romans. Here too, warts and all, are the Saxon, Viking and Norman kings who laid the political foundations of England: Offa of Mercia, Alfred the Great, Athelstan, and William the Conqueror, whose victory at Hastings in 1066 marked the end of Anglo-Saxon England. Reflecting the latest historical, textual and archaeological research, this revised and updated edition of Michael Wood's classic book overturns preconceptions of the Dark Ages as a shadowy and brutal era, showing them to be a richly exciting and formative period in the history of Britain.
