Medical Anthropology Tyndale House Publishers, Inc.

Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often

than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

Action is the foundational key to all success. Pablo Picasso What does it take to succeed? How can I succeed? These are the questions that have been asked over the years. One method of learning more is to review the Success Manifesto of those who have attained success in their fields. As we know, a manifesto is a public declaration of intentions, motives or views.

In this book, the CelebrityExperts(R) herein share their experiences in their various fields. Like most readers, these authors began their missions at ground zero. As they progressed to success, they harnessed or developed many traits that they share. These traits typically include: a vision or chosen goal, perseverance, a knowledge of and passion for the subject, a willingness to take calculated risks, a plan, and the courage to take action. Regardless of the goals the authors have chosen, by using their ideas to mentor you, you can profit from their experiences, both positive and negative - thereby avoiding a loss of time and resources as you move closer to your own goal(s). So, are you ready? If you are, then go into action and start the process. Just think - one day you could write your own Success Manifesto It had long since come to my attention that people of accomplishment rarely sat back and let things happen to them. They went out and happened to things. Leonardo da Vinci Fire Control Technician (FT). Walter de Gruyter
