This book looks at the first century of the Detroit Auto Show, the largest auto show in the world for many years. From the first show at the Detroit Light Guard Armory in 1899 to the January 1999 show at Cobo Hall, this fascinating book details the show's evolution over 100 years, and how it became the industry's most prominent event. The First Century of the Detroit Auto Show introduces pioneers such as William Metzger, who was instrumental in organizing the first show and played a prominent role in many shows of the early 1900s. Each year's show is covered in a chapter which includes information on the major players of the show, products featured, size, exhibitors, decor, opening ceremonies, admission fares, and entertainment. The book features over 100 historical and nostalgic photos to bring the reader in touch with the culture of the automotive industry and society at the time.

A captivating account of the history of the industry's showcase event, this book belongs on the bookshelves of every automotive historian, enthusiast, and engineer.

For American teenagers, getting a driver's license has long been a watershed moment, separating teens from their childish pasts as they accelerate toward the sweet, sweet freedom of their futures. With driver's license in hand, teens are on the road to buying and driving (and maybe even crashing) their first car, a machine which is home to many a teenage ritual—being picked up for a first date, “parking” at a scenic overlook, or blasting the radio with a gaggle of friends in tow. So important is this car ride into adulthood that automobile culture has become a stand-in, a shortcut to what millions of Americans remember about their coming of age. *Machines of Youth* traces the rise, and more recently the fall, of car culture among American

teens. In this book, Gary S. Cross details how an automobile obsession drove teen peer culture from the 1920s to the 1980s, seducing budding adults with privacy, freedom, mobility, and spontaneity. Cross shows how the automobile redefined relationships between parents and teenage children, becoming a rite of passage, producing new courtship rituals, and fueling the growth of numerous car subcultures. Yet for teenagers today the lure of the automobile as a transition to adulthood is in decline. Tinkerers are now sidelined by the advent of digital engine technology and premolded body construction, while the attention of teenagers has been captured by iPhones, video games, and other digital technology. And adults have become less tolerant of teens on the road, restricting both cruising and access to drivers' licenses. Cars are certainly not going out of style, Cross acknowledges, but how upcoming generations use them may be changing. He finds that while vibrant enthusiasm for them lives on, cars may no longer be at the center of how American youth define themselves. But, for generations of Americans, the modern teen experience was inextricably linked to this particularly American icon.

Yo! University of Chicago Press

DieCast X covers the entire spectrum of automotive diecast from customizing to collecting. It takes an insider's look at the history behind popular diecast cars and trucks, as well as how each model has helped shape the automotive industry and motor sports

Industrialists in Olive Drab Trafford Publishing

"I thought life was pretty much over."
Paul Herman "I was afraid people wouldn't see me for who I still was."

Cathy Green "I didn't need this to be a better person." Susan Douglas "I wasn't sure I wanted to live 'this way.'" Kevin Wolitzky The above four people and 49 more just like them went on to find high levels of success and lead satisfying lives. Together they tell 53 stories of moving forward to meet all the challenges, fears, obstacles, and problems common to the life-altering circumstances after spinal cord injury, and doing it without benefit of wealth, large settlements or solid health coverage. Ranging in age from 21 to 67, disabled from three to 48 years they share 931 years of disability experience. Roll Models is a valuable new resource for recently injured people and their families, and for nurses, therapists, psychologists and all other professionals who treat, work with and care for people with spinal cord injury. Straight from the horse's mouth, survivors explore their experiences with disability and answer many questions those in rehab are asking: Early Thoughts What were your thoughts immediately following injury? What were your initial thoughts and reactions regarding SCI and the future? The First Years What were your biggest fears during that first year or so? How did you get past those early fears? Changes, Obstacles and Solutions How much different are you now, compared to how you were before injury? What's been the biggest obstacle? How did you address these obstacles? Finding What Works What have been the most difficult things for you to deal with since injury? What's the worst thing about having an SCI and using a chair? What's been your biggest loss due to injury? Is SCI the worst thing that ever happened to you? Tell me something about your problem solving skills. How do you deal with stress? What do you do to relieve stress? Salvations, Turning Points and More Was there any one thing that was your "salvation" or key to your success? Was there a turning point for you when you began to feel things were going to get

better? What personal factors, habits and beliefs have helped you the most? SCI and Meaning Do you find any meaning, purpose or lessons in your disability? Did any positive opportunities come your way because of your injury? What's your greatest accomplishment? What are you most proud of? "A wonderful roadmap with many alternate routes to living and thriving with SCI." Minna Hong, SCI survivor and Peer Support Coordinator/Vocational Liaison, Shepherd Center "Avoids the trap of providing a "one size fits all mentality" and provides solutions as varied as the individuals used as examples. Accentuates the positives while not sugar coating the difficulties. Essential reading." Jeff Cressy SCI survivor and Director of Consumer and Community Affairs, SCI Project, Rancho Los Amigos "A great resource for people as they venture out into the world, or search for meaning and a deeper, richer life. Filled with examples of real people and their real experiences." Terry Chase, ND, RN; SCI survivor; Patient & Family Education Program Coordinator, Craig Hospital "A wonderful tool for the newly spinal cord injured individual, as well as the therapists and counselors working with them. This certainly hits the mark in capturing important survival strategies." Jack Dahlberg, SCI survivor, Past President of the National Spinal Cord Injury Association "Artfully crafted and organized, Roll Models sensitively portrays life following spinal cord injury. Informative, creative, sensitive, as well as infused with humor and a kind heart. Recommended with my highest accolades." Lester Butt, Ph.D., ABPP, Director of the Department of Psychology, Craig Hospital

 Consumer Guide Books
 One of the most remarkable mechanized campaigns of recent years pitted the brutal and heavily armed jihadis of Islamic State against an improvised force belonging to the Kurdish YPG (later the SDF). While some Kurdish vehicles were originally from Syrian Army stocks or captured from ISIS, many others were extraordinary homemade AFVs based on truck or digger mechanicals, or duskas, the Kurds' version of the technical. Before US air power was sent to Syria, these were the Kurds' most powerful and mobile weapons. Co-written by a British

volunteer who fought with the Kurds and an academic expert on armoured warfare, this study explains how the Kurds built and used their AFVs in the war against 'Daesh', and identifies as far as possible which vehicles took part in major battles, such as Kobane, Manbij and Raqqa. With detailed new artwork depicting the Kurds' range of armour and many previously unpublished photos, this is an original and fascinating look at modern improvised mechanized warfare.

Kurdish Armour Against ISIS Jeffrey Frank Jones

Atlanta magazine's editorial mission is to engage our community through provocative writing, authoritative reporting, and superlative design that illuminate the people, the issues, the trends, and the events that define our city. The magazine informs, challenges, and entertains our readers each month while helping them make intelligent choices, not only about what they do and where they go, but what they think about matters of importance to the community and the region. FM 21-11 1943: Basic field manual, first aid for soldiers.(OBSOLETE)

"The purpose of this manual is to teach the soldier what he can do for himself or a fellow soldier if injury or sickness occurs when no medical officer or Medical Department soldier is nearby. Information is

also given concerning the use of certain supplies which are for the purpose of helping to keep well. This field manual addresses wounds, fractures/dislocations/sprains, common emergencies and health measures, effects of severe cold and heat, measures for use in the jungle/tropics and in aircraft and tank injuries, transportation of sick and injured, war gases, and description and uses of first-aid kits and packets.

How to Draw Cool Wheels

This thoroughly updated second edition of the best-selling Unofficial LEGO Technic Builder's Guide is filled with tips for building strong yet elegant machines and mechanisms with the LEGO Technic system. World-renowned builder Pawe? "Sariel" Kmiec covers the foundations of LEGO Technic building, from the concepts that underlie simple machines, like gears and linkages, to advanced mechanics, like differentials and steering systems. This edition adds 13 new building instructions and 4 completely new chapters on wheels, the RC system, planetary gearing, and 3D printing. You'll get a hands-on introduction to fundamental mechanical concepts like torque, friction, and traction, as well as basic engineering principles like weight distribution, efficiency, and power transmission—all with the help of Technic pieces. You'll even learn how Sariel builds his amazing tanks, trucks, and cars to scale. Learn how to: – Build sturdy

connections that can withstand serious stress – Re-create specialized LEGO pieces, like casings and u-joints, and build custom, complex Schmidt and Oldham couplings – Create your own differentials, suspensions, transmissions, and steering systems – Pick the right motor for the job and transform it to suit your needs – Combine studfull and studless building styles for a stunning look – Build remote-controlled vehicles, lighting systems, motorized compressors, and pneumatic engines This beautifully illustrated, full-color book will inspire you with ideas for building amazing machines like tanks with suspended treads, supercars, cranes, bulldozers, and much more. What better way to learn engineering principles than to experience them hands-on with LEGO Technic? New in this edition: 13 new building instructions, 13 updated chapters, and 4 brand-new chapters!

Car Marques is the most detailed and comprehensive guide to car badges ever published. In 224 pages it reveals the history and design of over 90 marques from around the world, each with color illustrations and annotated diagrams. British motoring journalist Simon Heptinstall, who helped launch BBC Top Gear magazine, describes each badge, details the story behind it, and uncovers snippets of information that will delight motoring enthusiasts. The introduction outlines how the book works and provides an overview of the history of car badges. Feature spreads show how the badges of iconic marques such as Buick and Peugeot have changed over time. It also contains profiles of major figures in the history of the automotive industry such as André Citroën, Gottlieb Daimler, William C. Durant, and Enzo Ferrari. The badges are arranged in alphabetic order and include world-famous marques such as Alfa Romeo, Aston Martin, BMW, Buick, Corvette, Lamborghini, Mercedes, Mustang, Porsche, and Toyota.

American Cars of the 1990s and Today

THE #1 NEW YORK TIMES
BESTSELLING JACK REACHER
SERIES THAT INSPIRED TWO
MAJOR MOTION PICTURES AND
THE STREAMING SERIES

REACHER "A thriller that gallops at a breakneck pace." —Chicago Sun-Times Jack Reacher. Hero. Loner. Soldier. Soldier's son. An elite military cop, he was one of the army's brightest stars. But in every cop's life there is one case that changes everything. For Jack Reacher, this is that case. New Year's Day, 1990. In a North Carolina motel, a two-star general is found dead. His briefcase is missing. Nobody knows what was in it. Within minutes Reacher has his orders: Control the situation. Within hours the general's wife is murdered. Then the dominoes really start to fall. Somewhere inside the vast worldwide fortress that is the U.S. Army, Reacher is being set up as a fall guy with the worst enemies a man can have. But Reacher won't quit. He's fighting a new kind of war—against an enemy he didn't know he had. And against

a conspiracy more chilling, ingenious, and treacherous than anyone could have guessed. The Enemy, like most of the books in the Jack Reacher series, can be read as a standalone thriller.

Roll Models

The Humvee, the modern-day US military four-wheel-drive successor to the Willys Jeep, is used by numerous armed forces around the world and in some civilian adaptations. Over 10,000 Humvees were deployed in numerous roles by coalition forces during the Iraq war. At least 25 variants of this highly versatile vehicle have been produced, from unarmoured light transport to surface-to-air missile platform, including ambulances, tracked versions, troop carriers and special ops variants. This manual provides a unique insight into the world of military Humvees, with an emphasis on military operation and equipment.
