"[This book] is a study of America's most controversial personal automobile. Featuring more than fifteen essays, this collection analyzes the Hummer through a wide array of disciplines. The editors, Elaine Cardenas and Ellen Gorman, have divided the essays into four groups: myth and space, myth and body, myth and discourse, and myth as vehicle. An introduction by the editors places the study of the Hummer in a cultural context." -- from cover, page 4.

The HMMWV, better known as the Humvee or Hummer, has set the world standard for army tactical vehicles since its introduction into the US Army in the 1980s. Designed to be the successor to the jeep of World War II with a greater load-bearing capacity, the Humvee has proven to be adaptable to a wide range of roles, including weapons carrier, missile launcher, command vehicle and other specialized types. This book traces the development and use of the Humvee and its variations, including the latest families of armored Humvees used in Iraq in 2003 – 05, and its adoption in a peacekeeping role the world over.

THE #1 NEW YORK TIMES BESTSELLING JACK REACHER SERIES THAT INSPIRED TWO MAJOR MOTION PICTURES AND THE STREAMING SERIES REACHER “ A thriller that gallops at a breakneck pace. ” —Chicago Sun-Times Jack Reacher. Hero. Loner. Soldier. Soldier ’ s son. An elite military cop, he was one of the army ’ s brightest stars. But in every cop ’ s life there is one case that changes everything. For Jack Reacher, this is that case. New Year ’ s Day, 1990. In a North Carolina motel, a two-star general is found dead. His briefcase is missing. Nobody knows what was in it. Within minutes Reacher has his orders: Control the situation. Within hours the general ’ s wife is murdered. Then the dominoes really start to fall. Somewhere inside the vast worldwide fortress that is the U.S. Army, Reacher is being set up as a fall guy with the worst enemies a man can have. But Reacher won ’ t quit. He ’ s fighting a new kind of war—against an enemy he didn ’ t know he had. And against a conspiracy more chilling, ingenious, and treacherous than anyone could have guessed. The Enemy, like most of the books in the Jack Reacher series, can be read as a standalone thriller.

One of the most remarkable mechanized campaigns of recent years pitted the brutal and heavily armed jihadis of Islamic State against an improvised force belonging to the Kurdish YPG (later the SDF). While some Kurdish vehicles were originally from Syrian Army stocks or captured from ISIS, many others were extraordinary homemade AFVs based on truck or digger mechanicals, or duskas, the Kurds' version of the technical. Before US air power was sent to Syria, these were the Kurds' most powerful and mobile weapons. Co-written by a British volunteer who fought with the Kurds and an academic expert on armoured warfare, this study explains how the Kurds built and used their AFVs in the war against 'Daesh', and identifies as far as possible which vehicles took part in major battles, such as Kobane, Manbij and Raqqa. With detailed new artwork depicting the Kurds' range of armour and many previously unpublished photos, this is an original and fascinating look at modern improvised mechanized warfare.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

This document records the oral and written testimony given by witnesses at a series of three Congressional hearings conducted in 1993 to review federal retraining programs for dislocated workers. Witnesses included representatives of federal and state agencies, and Private Industry Councils. Witnesses testified about their programs and what has worked and has not worked in their efforts to retrain dislocated workers. The existing programs were described and suggestions made for improvements, including putting programs in place before layoffs, and shortening the timeframe for retraining programs so workers can afford to complete them. However, according to witnesses, whatever successes have occurred have been tempered by the sluggish economy and the reality that most of the new jobs for which workers can be retrained pay substantially less than the jobs they have lost.
