"50 Years with Car and Driver commemorates the golden anniversary of the most popular car magazine on the planet. But more than that, 50 Years with Car and Driver tells the story of the American automobile and how the editors of the magazine witnessed that history and

reported on it, firsthand. A look at how Car and Driver evolved from its beginnings as Sports Cars Illustrated, in the able hands of great automotive journalists such as Ken Purdy and John Christy, and then came into it own as the musclecar era of the Sixties dawned. Writers such as David E. Davis, Jr., Brock Yates and Patrick Bedard helped to craft a literary car magazine that drew as much inspiration from Tom Wolfe's writing as it did from the great cars of the day." "Through the Seventies the magazine's

reputation solidified as the technical authority on new cars, and the literary tradition continued with such writers as Don Sherman and author P.J. O'Rourke." "Throughout the Eighties, the magazine prospered even when its writers went off the deep end - literally, getting stranded in Mexico during a Baja comparison test. Car and Driver watched over the virtual rebirth of the American car during that decade, with the renaissance at Ford through the Taurus and the revival of the Corvette, while

keeping its lock on the strongest feature writing in the auto magazines with stories like Brock Yates's thirty-years-past observance of the death of James Dean." "The Nineties saw Car and Driver continue its leadership as the world's largest-selling automotive magazine. From the introduction of the Acura NSX and the Mazda Miata to the brand-new Mustangs and Corvettes that have come in just the past years, Car and Driver has been the authority that readers trust when it comes to 0-60 times, road tests

and reviews." "Fifty Years with Car and Driver combines classic stories from the magazine, commentary by former staffers including the author, vintage and modern photos of the hottest and most important cars reviewed by the magazines, as well as stories from behind the scenes - with all the attitude, expertise and visual excitement readers have come to expect from the magazine itself."--BOOK JACKET.

[Chinese Power \(English\)](#)

One of the most remarkable mechanized campaigns of recent years pitted the brutal and heavily armed jihadis of Islamic State

against an improvised force belonging to the Kurdish YPG (later the SDF). While some Kurdish vehicles were originally from Syrian Army stocks or captured from ISIS, many others were extraordinary homemade AFVs based on truck or digger mechanicals, or duskas, the Kurds' version of the technical. Before US air power was sent to Syria, these were the Kurds' most powerful and mobile weapons. Co-written by a British volunteer who fought with the Kurds and an academic expert on armoured warfare, this study explains how the Kurds built and used their AFVs in the war against 'Daesh', and identifies as far as possible which vehicles took part in major battles, such as Kobane,

Manbij and Raqqa. With detailed new artwork depicting the Kurds' range of armour and many previously unpublished photos, this is an original and fascinating look at modern improvised mechanized warfare.

Do you think Chinese tanks and models are not interesting? Wait to see this book ... Until now is the most complete, detailed and exhaustive study about PLA for modelers ever done. This book is not only having historians in mind but also for modelers and readers that can be interested to know

something more about the Chinese army power. After reading this book many modelers will have much more interest in building a Chinese vehicle as next model.

Through its pages we will discover not only the power and main weapons of the Chinese PLA since its origins, but also the way to paint them, showing different techniques and camouflages for the Chinese vehicles. The kits which appear in this book, belong to the main Chinese brands, and makes this book the perfect guide not only for

modelers and enthusiasts of Chinese tanks and its strange and exotic camouflages but also for any modelers that want to have a reference book. Modelers and historians like Adam Wilder, Kristof Pulinks, Lukasz Orczyyc-Musialek, Lester Plaskitt, Sven Frich, Zach Sex, Gordon Arthur, Lei Xu, Verlag Jochen, Chris Jerret, Oscar Ebr í , Brian Murdoch or David Bocquelet give us an idea of the quality of this publication that until now is the most complete, detailed and exhaustive study about PLA for modelers ever done.
