### **Encyclopedia of Major Marketing Campaigns** Motorbooks

When the Louisville and Nashville Railroad was founded in 1850, it was the first major railroad in the west, and the only one headquartered in Kentucky. In the twentieth century, the L&N grew into one of the nation's major rail systems,

reaching from the Great Lakes to the Ohio River Valley and down to Florida and the Gulf Coast. Kincaid Herr worked for the Louisville and Nashville for more than forty years, and this book originated as a series of articles that he wrote for L&N Magazine between 1939 and 1942. After various printings through the 1940s and '50s, this fifth edition, completely revised and updated, was released in 1964. The 1950s saw the reluctant abandonment of the old steam engine (the L&N was

---

a major coal-carrying railroad) in favor of the diesel. During the late 1950s and early 60s, the railroad experienced significant expansion in the South, where the economy was being fueled by new industry. Coal, automobiles, mail, and passengers all counted on the L&N to get them around the region. Herr traces the development and expansion of the L&N system over a century and profiles important company figures, such as longtime L&N president Milton Smith. Confederate raider John

Hunt Morgan and railroad bandit Morris Slater also find their place in this entertaining history. Four appendices on topics ranging from the materials used to build trains to passenger equipment to motive power round out the complete, but accessible, account. Even after all these years, this volume remains the concise, illustrated history of "The Old Reliable" for its many fans around the world.

remarkable mechanized dushkas, the Kurds' campaigns of recent years pitted the brutal and heavily armed jihadis of Islamic State against an improvised force belonging to the Kurdish YPG (later the SDF). While some Kurdish vehicles were originally from Syrian Army stocks or captured from ISIS, many others were extraordinary homemade AFVs based on truck or digger mechanicals, or

version of the technical. Before US air power was sent to Syria, these were the Kurds' most powerful and mobile weapons. Co-written by a British volunteer who fought with the Kurds and an academic expert on armoured warfare, this study explains how the Kurds built and used their AFVs in the war against 'Daesh', and identifies as far as possible which
