achieved with its 300SL, exploiting an advanced space-type frame and aerodynamic body with gullwing doors. Already the subject of a Ludvigsen Library Series book, the racing 300SL inspired the creation of a production version, which first took flight in 1954. The 300SL stunned critics and experts alike with its fabulous performance-more than 150 miles per hour-exotic looks and superb build quality. Not just a pretty face, the 300SL was also extremely successful in competition on both sides of the Atlantic. The original coupe was followed by a roadster version in 1957; in all, 3,258 were made. Drawing on his unmatched archive of Mercedes-Benz photos, including coverage by Rudy Mailander

and Edward Eves of the 300SL production line, Karl Ludvigsen presents the 300SL in all its glory. He also draws on his own experience as an owner of one of these great cars.

Manual Bentley Pub

Just as the Beetle started a long tradition of Volkswagen automotive excellence, these are the manuals that created the Bentley reputation for clarity, thoroughness, and indispensability. Our air-cooled Volkswagen manuals provide both do-it-yourself owners and professional mechanics with clear explanations and illustrations, detailed service steps, and time-saving troubleshooting tips. In the same tradition as our classic 1961-1965 Type 1 manual, this manual offers owners of 1960s vintage Transporters

the long out-of-print factory repair information.

Indispensable to anyone interested in the history or restoration of the Transporter, this book includes complete coverage of 1200 and 1500 engines, dual-circuit brakes, and body dimension specifications for all models, including those with a sliding sunroof. All factory updates are listed by chassis number and date introduced. This is the one book no serious Type 2 enthusiast should be without.

edition is one of The Motorcyclist's Library series

published in the USA by Floyd Clymer by arrangement with the original publishers, Pitman Ltd. of London, England.

Obviously, while this re-print of the fifth edition is somewhat specific to the 1933-1939

motorcycles, much of

the information is also appropriate to earlier Rudge models. As there is so little repair and maintenance data available for these motorcycles, the information included, while not of the detail or level of a technical manual, will be of assistance to any Rudge motorcycle owner.

Models that are covered include the: 250cc Tourist, Rapid & Sport and the 500cc Special, Sports Special & Ulster.

This publication has been out-of-print and unavailable for many years and is becoming increasingly more difficult to find on the secondary market and we are pleased to be able to offer this reprint as a service to all Rudge motorcycle enthusiasts worldwide.
