The MGB was a great British success story, a product largely conceived, designed and produced by a small team of dedicated people who genuinely cared about their work. Of course, the MGB came from a proud, successful sports car tradition, and the model it replaced - the revolutionary aerodynamic MGA - had been an unprecedented success - so the new car had big shoes to fill. Launching in 1962 and in production for eighteen years, the MGB became one of the most successful sports cars the world has ever known. This book describes how the MGB arose principally from the ideas of one man, MG's Chief Engineer, Syd Enever, how it was designed and developed, how it survived and thrived, and how it became the classic car still highly regarded today. There have been many previous books about the MGB, and the related MGC and V8 variants, but MGB - The superlative MG reaches a new level of detail together seasoned with fresh insight. David Knowles has been researching and writing about the MGB for more than thirty years. Prepare to be surprised at some of the stories you will have never read before, and new twists on some you possibly thought you knew well.

The Whirlwind War Bentley Publishers

First shown as the TT coupe concept at the 1995 Frankfurt Motor Show and then soon afterward as the TT convertible at the Tokyo Motor Show, the cars heralded a new design language from Audi - the Bauhaus style from the 1930s that looked a little brutal at first, but has proven to have a long and successful production life. It finally arrived on the European market for the 1999 model year, with America following a little later. Senior Audi models, the A4, A6, and A8, have their engine and transmission sited longitudinally in the car, but the TT was based on the smaller A3 platform, which meant that the mechanical components were sited transversely. After a slow start, sales picked up and have remained strong ever since. The media loved the Audi TT and continued to write glowing reports about it even though it was six years old in the marketplace, outlasting the Mercedes-Benz SLK, BMW Z3, and Porsche Boxster by quite some time.

Shows the various strands that came together to produce the army of the 1990s and how that army in turn performed under fire and in the glare of world attention. Retains a sense of immediacy in its approach. Contains maps which were carefully researched and compiled as original documents in their own right. Includes an index.

MGB - The superlative MG Haynes Service and Repair Manuals

The Audi TT is one of the few cars which transcends the automotive world, and is applauded for its design per se. Since its launch in early 1999, the TT has been a spectacular sales success, particularly in the UK and the USA. Quattro four-wheel-drive makes the TT unique amongst the current crop of coupes and roadsters. Nearly six years after it was first unveiled to the press, the car still turns heads, and has inspired a burgeoning aftermarket accessory and tuning industry. This all-color book will fascinate all Audi TT owners and sports car enthusiasts in general.

"The Volkswagen Beetle and Karmann Ghia Service Manual Type 1: 1966-1969 features wiring diagrams (including 6-volt systems), convertible top repair, carburetor rebuilding (30 PICT-1 and 30 PICT-2) and comprehensive year and model specifications and troubleshooting tables"--Amazon.com

Saab 9000 (4-cylinder)

The 105-mm M2A1 Howitzer was the standard light field artillery piece for the United States in World War II, seeing action in both the European and Pacific theaters. Starting production in 1941, it quickly entered the war against the Imperial Japanese Army in the Pacific, where it gained a reputation for its accuracy and powerful punch. The M2A1 fired 105-mm high explosive (HE) semi-fixed ammunition and had a range of 11,270 meters, making it suitable for supporting infantry. All of these qualities of the weapon, along with its widespread production, led to its adoption by many countries after the war. Its ammunition type also became the standard for many foreign countries' later models. In 1962, the artillery designation system was changed and the 105-mm M2A1 Howitzer became the M101A1. It continued to see service in the Korean and Vietnam Wars. Today, the M101A1 has been retired by the U.S. military, though it continues to see service with many other

countries. Created in 1948, this technical manual reveals a great deal about the M2A1 Howitzer's design and capabilities. Intended as a manual for those charged with operation and maintenance, it details many aspects of its firing, recoil and other mechanisms. Originally labeled restricted, this manual was declassified long ago and is here reprinted in book form. Care has been taken to preserve the integrity of the text.
