"Many interesting
developments have
occurred in the world of
venture capital since the

publication of the first edition
of this book in 2006, which
prompted us to revise the
book for the second edition.
While the organization of the
book remains unchanged,
many of the chapters are
substantially rewritten. For
example, in Chapter 5, we re-
ranked top VC firms,
incorporating the latest
performance statistics,
fundraising and investment
activities, notable exits, and
(as always) our subjective
opinions. In Chapter 6, we
examine further evidence of
the deepening globalization
of the industry. In Chapters
3, 4, and 7, we analyze the
impact of the 1999-2000
Internet bubble years on the
VC risk and returns, as
investments made in those
years are finally mature and
thus now a part of the
performance evaluation
analysis. We also
incorporated expositional
improvements throughout
the book based on reader
feedback on the first edition.
Another feature of the new
edition is that the VCV
model, used extensively in
Part III of the book, is now
available as a Web-based
application available on
<http://VCVtools.com>.
Significant collaborative
efforts went into developing
this tool, which we believe
will be of interest to a broad
audience, including
practitioners interested in

valuing VC-backed company stocks and employee stock options"
