Relive Mopar's skunkworks racing team and its rise to dominance in this fascinating history! The drama of 1970s Chrysler Pro Stock drag racing unfolds in this new book, which focuses on the racing and technological evolution of the legendary Motown Missile and Mopar Missile racing programs from 1970 to 1977. Unequaled by any other drag racing development program, this was a huge undertaking in term of time, money, and effort. The 1970s saw great change in Detroit and in auto racing, with Pro Stock being a huge draw for fans. Chrysler racing historian and author Geoff Stunkard presents a chronological recollection, drawing from many interviews and summaries of the actual technical efforts that the factory accomplished and including both rare, unpublished technical and personal images from the team members and some of the most dramatic images taken by the sport's best photographers. From the earliest days of owner/engine builder Ted Spehar, factory engineer Tom Hoover, and driver Don Carlton, the narrative is a colorful look at the team's inner workings, programs, victories, and even defeats. Set against a backdrop of characters like Bill "Grumpy" Jenkins, "Dandy Dick" Landy, and "Dyno" Don Nicholson, Carlton's driving prowess had few equals. Indeed, called by one period scribe as a "cyborg," the likeable pilot would pay the ultimate price as a drag racing driver. From the Challengers and 'Cuda to the Demons and Colts, the book showcases the cars that made Chrysler so much a part of this racing era, as well as Ted Spehar's never-before-revealed information on the 1970s Pro Stock engine program.

Gonzo journalist and literary roustabout Hunter S. Thompson flies with the angels-Hell's Angels, that is-in this short work of nonfiction. "California, Labor Day weekend . . . early, with ocean fog still in the streets, outlaw motorcyclists wearing chains, shades and greasy Levis roll out from damp garages, all-night diners and cast-off one-night pads in Frisco, Hollywood, Berdoo and East Oakland, heading for the Monterey peninsula, north of Big Sur. . . The Menace is loose again." Thus begins Hunter S. Thompson's vivid account of his experiences with California's most notorious motorcycle gang, the Hell's Angels. In the mid-1960s, Thompson spent almost two years living with the controversial Angels, cycling up and down the coast, reveling in the anarchic spirit of their clan, and, as befits their name, raising hell. His book successfully captures a singular moment in American history, when the biker lifestyle was first defined, and when such countercultural movements were electrifying and horrifying America. Thompson, the creator of Gonzo journalism, writes with his usual bravado, energy, and brutal honesty, and with a nuanced and incisive eye; as *The New Yorker* pointed out, "For all its uninhibited and sardonic humor, Thompson's book is a thoughtful piece of work." As illuminating now as when originally published in 1967, *Hell's Angels* is a gripping portrait, and the best account we have of the truth behind an American legend.

The venerable Jeep 4.0-liter inline-six engine has powered millions of Jeeps, including CJs, YJs, Wranglers, Cherokees, and Wagoneers. The 4.0 delivers adequate horsepower from the factory, but many off-road drivers want more horsepower and torque to conquer challenging terrain, which means these engines are often built and modified. The Jeep 4.0, or 242-ci, is affordable, abundant, exceptionally durable, and many consider it one of the best 4x4 off-road engines. In this *Workbench* title, veteran author and Chrysler/Jeep engine expert Larry Shepard covers the rebuild of an entire engine in exceptional detail. He also delves into popular high-performance modifications and build-ups. Step-by-step photos and captions cover each crucial step of the engine

disassembly. He shows the inspection of all critical parts, including block, heads, rotating assembly, intake, and exhaust. Critical machining processes are covered, such as decking the block, line boring, and overboring the block. The book provides exceptional detail during the step-by-step assembly so your engine is strong and reliable. Installing a larger-displacement rotating assembly or stroker package is one of the most cost-effective ways to increase performance, and the author covers a stroker package installation in detail. With millions of Jeep 4.0 engines in the marketplace (which are subjected to extreme use), many of these engines require a rebuild. In addition, many owners want to extract more torque and horsepower from their 4.0 engines so these engine are also modified. Until now, there has not been a complete and authoritative guide that covers the engine rebuild and build-up process from beginning to end. Jeep 4.0 Engines is the essential guide for an at-home mechanic to perform a professional-caliber rebuild or a high-performance build-up.

How do the rich get rich? An updated edition of the "remarkable" New York Times bestseller, based on two decades of research (The Washington Post). Most of the truly wealthy in the United States don't live in Beverly Hills or on Park Avenue. They live next door. America's wealthy seldom get

that way through an inheritance or an advanced degree. They bargain-shop for used cars, raise children who don't realize how rich their families are, and reject a lifestyle of flashy exhibitionism and competitive spending. In fact, the glamorous people many of us think of as "rich" are actually a tiny minority of America's truly wealthy citizens--and behave quite differently than the majority. At the time of its first publication, *The Millionaire Next Door* was a groundbreaking examination of America's rich--exposing for the first time the seven common qualities that appear over and over among this exclusive demographic. This edition includes a new foreword by Dr. Thomas J. Stanley--updating the original content in the context of the financial crash and the twenty-first century. "Their surprising results reveal fundamental qualities of this group that are diametrically opposed to today's earn-and-consume culture." --Library Journal
