A daily diary of actual interactions between a reference desk librarian and his patrons *Reference Librarianship* documents a year in the life of a young librarian working in the "trenches" at a library in the Midwestern United States. This one-of-a-kind book provides a daily diary of every librarian/patron transaction—no matter how mundane or absurd—to demonstrate not only how advances in

---

technology have affected the reference librarian's job, but how the public's expectations have changed, as well. The book also includes observations by a now-retired reference librarian on the current state of the field based on these unedited interactions. Over the past two decades, the job of reference librarian has seen many changes. But in many ways, reference desk work hasn't changed a bit, with its mix of odd, humorous, routine, and ridiculous requests that capture what it's like to deal with patrons day after day. Reference Librarianship paints a clear picture of the field for library school students, provides emotional and philosophical support to practitioners, and reminds library administrators of what life was like on the "front lines." A sampling of the daily transactions documented in Reference Librarianship: Monday, May 19, 2003: pencil pencil network down I tell people that I can't sign them up for an Internet terminal because the network is down and they just stand there, staring into space One of them asks for three days worth of newspapers microfiche machine explanation Sorry, Sir, the network is still down (multiply by twenty and insert randomly into the remainder of the day) magic tricks, but he pretty much knew where they were One of our large interior plate glass windows shattered. No one was hurt and it made a fascinating noise, like a crystal waterfall landing on soil.

“ Books on prostitution, you know—whores? ” Someone from the County called to ask if any criminal activity had occurred on a particular street. Someone else referred her to us. She was dubious—with good reason. “ Math puzzles. ” Okay. I show him the books. “ Just math. ” Certainly. I show him the books. “ I need them in Spanish. ” Grrr ... Reference Librarianship is an enlightening, educational, and entertaining look at the real world of reference desk work. It ’ s an essential read for reference librarians (both public and academic), library administrators, and library school students, as well as anyone who works with the public. American Military History Volume 1  
Haynes Publishing UK

American Military History provides the United States Army-in particular, its young officers, NCOs, and cadets-with a comprehensive but brief account of its past. The Center of Military History first published this work in 1956 as a textbook for senior

ROTC courses. Since then it has gone through a number of updates and revisions, but the primary intent has remained the same. Support for military history education has always been a principal mission of the Center, and this new edition of an invaluable history furthers that purpose. The history of an active organization tends to expand rapidly as the organization grows larger and more complex. The period since the Vietnam War, at which point the most recent edition ended, has been a significant one for the Army, a busy period of expanding roles and missions and of fundamental organizational changes. In particular, the explosion of missions and deployments since 11 September 2001

---

has necessitated the creation of additional, open-ended chapters in the story of the U.S. Army in action. This first volume covers the Army's history from its birth in 1775 to the eve of World War I. By 1917, the United States was already a world power. The Army had sent large expeditionary forces beyond the American hemisphere, and at the beginning of the new century Secretary of War Elihu Root had proposed changes and reforms that within a generation would shape the Army of the future. But world war-global war-was still to come. The second volume of this new edition will take up that story and extend it into the twenty-first century and the early years of the war on terrorism and

includes an analysis of the wars in Afghanistan and Iraq up to January 2009.

by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix

weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine, fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting
