Popular Science gives  
our readers the  
information and tools to  
improve their

technology and their  
world. The core belief  
that Popular Science  
and our readers share:  
The future is going to  
be better, and science  
and technology are the  
driving forces that will  
help make it better.  
Popular Science Robert  
Bentley, Incorporated  
You ' ve Never Seen What  
You ' ve Always Needed  
to Know – Until Now  
Invisible forces are at  
work. They push and  
shove on everything you  
buy or sell. They affect  
every concept you want

to take to market, all the  
suppliers you ' ll deal with,  
and every customer  
you ' ll ever see. To be  
successful, you need to  
understand them. See  
them in detail in ways not  
possible with other  
methods. Hypernomics:  
Using Hidden Dimensions  
to Solve Unseen  
Problems discovers that  
markets behave according  
to previously unknown  
laws set by the buyers  
and sellers within them. It  
reveals those rules and  
how to detect, describe,  
and deploy them to your

---

advantage. It doesn't change economics so much as reveal it. It's like a microscope looking at pond water, a telescope tilted to the sky, sonar scanning the bottom of the ocean. Hypernomics lets you see into markets in ways you can't with the unaided eye. Sailors never navigate without a map. You shouldn't either, since your ship could wind up on the rocks. Hypernomics gives you the means to create market maps that show you where they have

openings and how to fill them by giving customers what they want, don't have, and can afford. It finds their thresholds and limits and responses to every possible feature in any product you can offer. The interactions Hypernomics describes have been with us since the dawn of humanity. Now you can finally see them and enjoy the advantages your competitors do not have. Validated by 13 published papers, multiple awards, a patent, and customers

such as NASA, Lockheed Martin, Virgin Galactic, and a restaurant down the street, only Hypernomics gives you the ability to solve problems as varied as How could a restaurant increase revenue by 25% by rearranging seating? How do you find, describe, and capitalize on open spaces in your market? What happens when an NFL player decreases his forty-yard dash time by a quarter of a second? If you tried to exceed a market's limitations, how could you

---

lose \$1B? How do markets change over time? Know what you need to. Discover Hypernomics.
