The General Motors G-Body is one of the manufacturer's most popular chassis, and includes cars such as Chevrolet Malibu, Monte Carlo, and El Camino; the Buick Regal, Grand National, and GNX; the Oldsmobile Cutlass Supreme; the Pontiac Grand Prix, and more. This traditional and affordable front engine/rear-wheel-drive design lends itself to common upgrades and modifications for a wide range of high-performance applications, from drag racing to road racing. Many of the vehicles GM produced using this chassis were powered by V-8 engines, and others had popular turbocharged V-6 configurations. Some of the special-edition vehicles were outfitted with exclusive performance upgrades, which can be easily adapted to other G-Body vehicles. Knowing which vehicles were equipped with which options, and how to best

incorporate all the best-possible equipment is thoroughly covered in this book. A solid collection of upgrades including brakes, suspension, and the installation of GMs most popular modern engine-the LS-Series V-8-are all covered in great detail. The aftermarket support for this chassis is huge, and the interchangeability and affordability are a big reason for its popularity. It's the last mass-produced V-8/rear-drive chassis that enthusiasts can afford and readily modify. There is also great information for use when shopping for a G-Body, including what areas to be aware of or check for possible corrosion, what options to look for, and what should be avoided. No other book on the performance aspects of a GM G-Body has been published until now, and this book will serve as the bible to G-Body enthusiasts for years to come.

In Europe, World War II was four months old by Christmas 1939. The City of Flint, an American freighter, had been instrumental in rescuing 1200 passengers from a torpedoed ocean liner, making headlines on both sides of the Atlantic. She was captured by a Nazi warship and sent towards a German port, rigged with explosives to ensure the British Navy would

not capture it. Norwegian soldiers liberated the ship--by then even Hitler knew her name. Christmas 1942 saw the City of Flint in New York with other freighters loading for North Africa. Allied codes had been cracked and the convoy was expected by a group of U-Boats. Secretly carrying poison gas as part of her cargo, she was torpedoed and exploded on January 25, 1943. Eleven survivors in her fourth lifeboat fought mountainous seas, sharks and hunger. One went mad and walked overboard. The others survived 46 days before rescue. Eyewitness accounts, war diaries and archival sources bring this untold story to life.
