At the age of twelve, American William R. Dunn decided to become a fighter pilot. In 1939 he joined the Canadian Army and was soon transferred to the Royal Air Force. He was the first pilot in the famous Eagle Squadron of American volunteers to shoot down an enemy aircraft and later became the first American ace of the war. After joining the U.S. Army Air Corps in 1943, he saw action in the Normandy invasion and in Patton's

---

sweep across France. Twenty years later he fought again in Vietnam. Dunn keenly conveys the fighter pilot's experience of war—the tension of combat, the harsh grip of fear, the love of aircraft, the elation of victory, the boisterous comradeship and competition of the pilot brotherhood. *Fighter Pilot* is both a gripping story and a unique historical document.

A look at the RAF service of the two most recognizable American-built fighters. The P-51 Mustang and P-47 Thunderbolt were the finest American fighters of World War 2, and both saw service with the

RAF in substantial numbers. The RAF began flying the Mustang in 1944, using it to fly bomber escort missions, and deploying to support the ground campaigns in Italy and the Balkans. It was also flown by a number of Polish units in the RAF. The P-47 Thunderbolt was the best fighter available in CBI theatre, where it was flown by a number of aces against the Japanese, mainly in a ground support role. Although these two fighter types are most associated with

the Americans, this book details the important role they performed serving in the RAF.
