Starting from a basic knowledge of
mathematics and mechanics gained in
standard foundation classes, Theory of
Lift: Introductory Computational
Aerodynamics in MATLAB/Octave takes
the reader conceptually through from
the fundamental mechanics of lift to the
stage of actually being able to make
practical calculations and predictions of

the coefficient of lift for realistic wing
profile and planform geometries. The
classical framework and methods of
aerodynamics are covered in detail and
the reader is shown how they may be
used to develop simple yet powerful
MATLAB or Octave programs that
accurately predict and visualise the
dynamics of real wing shapes, using
lumped vortex, panel, and vortex lattice
methods. This book contains all the
mathematical development and
formulae required in standard
incompressible aerodynamics as well as
dozens of small but complete working
programs which can be put to use
immediately using either the popular
MATLAB or free Octave computational

modelling packages. Key features:
Synthesizes the classical foundations of aerodynamics with hands-on computation, emphasizing interactivity and visualization. Includes complete source code for all programs, all listings having been tested for compatibility with both MATLAB and Octave. Companion website (www.wiley.com/go/mcbain) hosting codes and solutions. Theory of Lift: Introductory Computational Aerodynamics in MATLAB/Octave is an introductory text for graduate and senior undergraduate students on aeronautical and aerospace engineering courses and also forms a valuable reference for engineers and designers.

Dale Earnhardt Jr.'s only authorized book revealing the inside track on his final year of racing and retirement from the driver's seat. "Time was running

out on my charade... My secrets were about to be exposed to the world." It was a seemingly minor crash at Michigan International Speedway in June 2016 that ended the day early for Dale Earnhardt Jr. What he didn't know was that it would also end his driving for the year. He'd dealt with concussions before, but concussions are like snowflakes, no two are the same. And recovery can be brutal, and lengthy. When NASCAR star Dale Earnhardt Jr. retired from professional stock car racing in 2017, he walked away from his career as a healthy man. But for years, he had worried that the worsening effects of multiple racing-related concussions would end not only his time on the track but his ability to live a full and

happy life. Torn between a race-at-his determination to share his own all-costs culture and the fear that experience so that others don't something was terribly wrong, Earnhardt tried to pretend that everything was fine, but the private notes about his escalating symptoms that he kept on his phone reveal a vicious cycle: suffering injuries on Sunday, struggling through the week, then recovering in time to race again the following weekend. For the first time, he shares these notes and fully reveals the physical and emotional struggles he faced as he fought to close out his career on his own terms. In this candid reflection, Earnhardt opens up about his frustration with the slow recovery, his admiration for the woman who stood by him through it all, and have to suffer in silence. Steering his way to the final checkered flag of his storied career proved to be the most challenging race and most rewarding finish of his life.

Ask Dr. Mueller captures the glamour and grittiness of Cookie Mueller's life and times. Here are previously unpublished stories - wacky as they are enlightening - along with favorites from *Walking Through Clear Water* in a Pool Painted Black and other publications. Also, the best of Cookie's art columns from *Details* magazine, and the funniest of her advice columns from the *East Village Eye*, on everything from homeopathic medicine to how

to cut your cocaine with a healthy substance. This collection is as much autobiography as it is a map of downtown New York in the early '80s - that moment before *Bright Lights, Big City*, before the art world exploded, before New York changed into a yuppie metropolis, while it still had a glimmer of bohemian life.

In *The Gun Show*, award-winning playwright E. M. Lewis tells the story of

America's relationship with guns through the prism of her own personal experiences. From a farming community in rural Oregon to the big cities of Los Angeles and New York, an actor shares Ms. Lewis's unique perspective and true stories about America's most dangerous pastime as if they were his or her own, with brutal honesty and poignant humor. Leaning neither right nor left, *The Gun Show* jumps into the middle of the gun control debate and asks, "Can we have a conversation about this?" The solo version of the play requires only a single actor. The role was conceived for a man to play, but you may cast a woman or non-binary actor in this role if desired. In the duo version of the play, the actual playwright - E. M. Lewis - sits out in the audience, and the actor playing the Playwright occasionally interacts with her, as indicated in the script. (The duo version of the play is only available for licensing by special request, depending upon the availability of Ms. Lewis to participate.)

Lean Thinking was launched in the fall of 1996, just in time for the recession of 1997. It told the story of how American, European, and Japanese firms applied a simple set of principles called 'lean thinking' to survive the recession of 1991 and grow steadily in sales and profits through 1996. Even though the recession of 1997 never happened, companies were starving for information on how to make themselves leaner and more efficient. Now we are dealing with the recession of 2001 and the financial meltdown of 2002. So what happened to the exemplar firms profiled in Lean Thinking?

In the new fully revised edition of this bestselling book those pioneering lean thinkers are brought up to date. Authors James Womack and Daniel Jones offer new guidelines for lean thinking firms and bring their groundbreaking practices to a brand new generation of companies that are looking to stay one step ahead of the competition.
