SAP R/3 Implementation | SpringerLink

SAP R/3 is the former name of the enterprise resource planning software produced by the German corporation SAP AG. It is an enterprise-wide information system designed to coordinate all the resources, information, and activities needed to complete business processes such as order fulfillment, billing, human resource management, and production planning. The current successor software to SAP R/3 is known as SAP S/4HANA.

It begins by characterizing the foundations of the latest ERP systems from both a conceptual and technical viewpoint, whereby the most important components and functions of SAP R/3 are described. The main part of the book then goes on to present the current methods and tools for the R/3 implementation based on newer process models (roadmaps).

Sap R/3 Implementation Guide | Guide books

The implementation of R/3 looked to automate the supply side process and integrate all supply-side data into a single real time database. To implement R/3 Geneva set up a team of 20 full and part time employees from within Sandoz (all of whom had no R/3 experience) and a team of 5 consultants from Whitman-Hart who had previous R/3 experience. Verne Evans, Director of Supply Chain Management, was assigned project leader.
