Automobile Quarterly Princeton, N.J. : Van Nostranc

When the Trans Am series let pony cars loose on the road circuits of America, some of the most exciting road racing in history took place. Until rule changes forced American manufacturer teams to withdraw in 1972, these ground-pounders enjoyed a golden era of dominance. Fans of vintage racing and muscle cars will enjoy this book's great photography and commentary from series participants, as well as comprehensive race results.

From 1915 through the early 1920s, American auto racing experienced rapid and exciting change. Competition by European vehicles forced American car manufacturers to incorporate new features, resulting in legendary engineering triumphs (and, essentially, works of art). Some of the greatest drivers in racing history were active during this time--Ralph DePalma, Dario Resta, Eddie Rickenbacker, the Chevrolet brothers, Jimmy Murphy. Presenting dozens of races in detail and a wealth of engineering specs, this history recalls the era's cigar-shaped speedway specials and monumental board tracks, the heavy-footed drivers, fearless mechanics, gifted engineers and enthusiastic backers.

Sir William Lyons enjoyed a seemingly unstoppable rise to fame and fortune in the motor industry, and the Jaguar brand that he introduced became world-famous. Yet it did not happen overnight. In the 1920s he was in Blackpool, styling motorcycle sidecars, and in the 1930s in Coventry developing the SS motor car, with the stand-alone Jaguar company not appearing until 1945. The company's success was aided by the amazing new XK engine of 1948, by motor racing success at Le Mans, and by the stunning styling of cars like the XK120, the Mk 2 saloons and the extraordinary E-Type. Graham Robson here explores the history of the Jaguar company and its many classic marques.

The Lola T70 was the car that Eric Broadley wanted to build for Ford instead of the GT40. He thought the GT40 too conservative in specification for a state-of-the-art sports racing car, so he split with the giant corporation to build the T70 under the aegis of his own company: Lola. Immediately successful, the T70 carried John Surtees to the Championship in the 1966 Can-Am series. The cars were also very successful in Group 7 races until the series ended in 1966, by which time the likes of Denny Hulme, David Hobbs and Brian Redman had all driven T70s to victory. Under continuous development until the Mk IIIb Coupé of 1969, the T70 was never a great endurance racer but achieved major successes in shorter events such as the TT and Martini races. Today, the T70 is a leading force in historic racing. Over many years, John Starkey – T70 owner and ex-Curator of the famous

Donington racing car collection – has compiled a huge amount of information on the cars and interviewed many past and present owners and drivers about their experiences with the T70. Uniquely, this book contains the history and specification – where known – of each individual T70 chassis. Available again after an absence of several years, here is the definitive development and racing history of the Lola T70.

The vision of one man, Captain Sherman "Red" Crise formed the basis for what was to become the Bahamas Speed Weeks, a series of motor races held on the island of New Providence in the Bahamas. They started in the mid 1950s and continued for 13 years, before ending due to a mix of political decisions, ill fortune and a shift in the direction motor racing had taken over that period of time. These years were described by many commentators as the golden age of motor racing, where internationally acclaimed drivers attended the Speed Weeks to mix with the many amateur racers from America who came to enjoy the scenario of sun, parties and racing. For many drivers the social scene was as important as the racing, and in latter years prize money was an extra incentive to turn up. This well researched account tracks the history of the Speed Weeks with its roller-coaster ride throughout its 13 years existence, and includes stunning photos, complete statistics, and more. With a foreword by Denise McCluggage.

Aston Martin is now more than a century old – and what a century it has been. Since its birth in London on the eve of the First World War, the company has experienced the highs of racing triumph – most famously in the 1959 Le Mans 24-hour race – and the lows of bankruptcy, yet throughout it all has been in the first rank of British marques. Published in association with the Aston Martin Heritage Trust and written by enthusiast Richard Loveys, Aston Martin is a fully illustrated history of the company that has created some of the world's best loved and most widely respected cars, including James Bond's iconic DB5. It covers the cars themselves, the personalities and talents who have shaped Aston Martin from owners to engineers, the drivers who have shared with the company in racing glory, and the centenary celebrations of 2013.

Model Road Racing Handbook

At the time, little was recorded about the activities of Alfa Romeo's World Championshipwinning Sports Racing car, the Tipo 33. The model had a long career, as a factory car as well as in private hands from 1967 until 1977. Great Italian motorsport engineer Carlo Chiti designed and ran a prolific number of different models of the Tipo. Unfortunately, nothing of the history of these developments was documented at the time, but the author has managed, after intense investigation and numerous personal interviews, to uncover much about this marvelous sports prototype.
