Speeches that Changed the World Marshall Cavendish Corporation

Throughout history, from Ancient Greece to the fall of Berlin Wall, words have been used to encapsulate emotions, to raise morale, and to revive dying embers of revolutions. Such is the power of words. They can change the views of the masses in minutes and thus they can change a population's hearts. Such changes of hearts in the past have shaped our world today, for better or worse. Past events are a great indicator of future events therefore it is very important for one to delve into the history books to seek out answers to one's own problems and possibly answers to global issues we face today. Therefore, due to the power words have and due to the importance of history, I have decided to write this

book compiling some of the most influential speeches ever delivered. This book follows a Triple-C approach. 1 - Context, 2- Content, 3 - Consequences. Simply stated, Context is the "backstory" of the speech. What was taking place historically before this speech. Content is the actual of the speech. Consequences is what happened after the speech. This approach allows the reader to understand why the speech was made and what effect the speech had on the course of history. After reading all three sections, the reader will understand why a speech shaped the world we live in today.

Speeches That Made History Rowman & Littlefield
The Address was delivered at the dedication of the Soldiers' National Cemetery in Gettysburg, Pennsylvania, on the afternoon of Thursday, November 19, 1863, during the American Civil War, four and a half months after the Union armies defeated those of the Confederacy at the decisive Battle of Gettysburg. In just over two minutes, Lincoln invoked the principles of human equality espoused by the Declaration of Independence and redefined the Civil War as a struggle not merely for the Union, but as "a new birth of freedom" that would bring true equality to all of its citizens, and that would also create a unified nation in which states' rights were no longer dominant. Throughout history, some books have changed the world. They have transformed the way we see ourselves - and each other. They have inspired debate, dissent, war and revolution. They have enlightened, outraged, provoked and comforted. They have enriched lives - and destroyed them. Now Penguin brings you the works of the great thinkers, pioneers, radicals and visionaries whose ideas shook civilization and helped make us who we are.

The Free Speech Movement in Berkeley, California, was pivotal in shaping 1960s America. Led by Mario Savio and other young veterans of the civil rights movement, student activists organized what was to that point the most tumultuous student rebellion in American history. Mass sit-ins, a nonviolent blockade around a police car, occupations of the campus administration building, and a student strike united thousands of students to champion the right of students to free speech and unrestricted political advocacy on campus. This compendium of influential speeches and previously unknown writings offers insight into and perspective on the disruptive yet nonviolent civil disobedience tactics used by Savio. The Essential Mario Savio is the perfect introduction to an American icon and to one of the most important social movements of the post-war period in the United States.

I Have a Dream Warwick House Publishing

This open access monograph argues established democratic norms for freedom of expression should be implemented on the internet. Moderating policies of tech companies as Facebook, Twitter and Google have resulted in posts being removed on an industrial scale. While this moderation is often encouraged by governments - on the pretext that terrorism, bullying, pornography, "hate speech" and "fake news" will slowly disappear from the internet - it enables tech companies to censor our society. It is the social media companies who define what is blacklisted in their community standards. And given the dominance of social media in our information society, we run the risk of outsourcing the definition of our principles for discussion in the public domain to private companies. Instead of leaving it to social media companies only to take action, the authors argue democratic institutions should take an active role in moderating criminal content on the internet. To make this possible, tech companies should be analyzed whether they are approaching a monopoly. Antitrust legislation should be applied to bring those monopolies within democratic governmental oversight. Despite being in different stages in their lives, Anne Mette is in the startup phase of her research career, while Frederik is one of the most prolific philosophers in Denmark, the authors found each other in their concern about Free Speech on the internet. The book was originally published in Danish as Dit opslag er blevet fjernet - techgiganter & ytringsfrihed. Praise for 'Your Post has been Removed' "From my perspective both as a politician and as private book collector, this is the

most important non-fiction book of the 21st Century. It should be disseminated to all European citizens. The learnings of this book and the use we make of them today are crucial for every man, woman and child on earth. Now and in the future." Jens Rohde, member of the European Parliament for the Alliance of Liberals and Democrats for Europe "This timely book compellingly presents an impressive array of information and analysis about the urgent threats the tech giants pose to the robust freedom of speech and access to information that are essential for individual liberty and democratic self-government. It constructively explores potential strategies for restoring individual control over information flows to and about us. Policymakers worldwide should take heed!" Nadine Strossen, Professor, New York Law School. Author, HATE: Why We Should Resist It with Free Speech, Not Censorship.
